

# **Surficial geology of the Kuytoocho Lake area, Manitoba (parts of NTS 64I10, 11, 14, 15)**

By M.S. Trommelen  
Manitoba Geological Survey  
Manitoba Mineral Resources

## **CONTENTS**

This zipped dataset contains:

1. Map PDF (1:50 000 scale).
2. ESRI® Shapefiles
3. This ReadMe.docx file

## **FILES**

In the root directory:

**ReadMe.pdf** – this file  
**MAP2013-2.pdf** – Surficial geology map

## **FOLDERS**

**\Data** – contains the major feature classes as ESRI® shapefiles

- **Map2013\_2\_geology.shp** – Surficial geology map polygons
- **geology.lyr** (for ArcMap)
- **Map2013\_2\_LineFeatures.shp** – Contains shape files of line feature classes (eskers, drumlins, drumlinoid ridges, meltwater channels and corridors, streamlined bedrock, trimlines, etc)
- **Linefeatures.lyr** (for ArcMap)
- **Map2013\_2\_PointFeatures.shp** – Contains shape files of point feature classes (outcrops, field sites, sample sites, striae, deltas, etc)
- **PointFeatures.lyr** (for ArcMap)
- **GSC\_SymbolStandard1.ttf** – required to display point feature symbols

## **REQUIREMENTS**

Viewing the included data requires either ESRI® ArcMap™ or similar GIS software capable of reading ESRI® shapefiles.

The documents in this zipped dataset are in Adobe® Portable Document Format (PDF) and require Adobe® Acrobat® Reader version 10 or newer for viewing and printing. The free reader can be downloaded from Adobe® at <http://www.adobe.com>.
