

AGGREGATE DEPOSITS IN THE
RURAL MUNICIPALITY OF MORTON

Legend

QUATERNARY

POST GLACIAL

7 Swamp deposits; organic muck and peat

PROGLACIAL

6 Lacustrine deposits: formed in Glacial Lake Whitewater

6b >2m silt and clay; plan surface flat to gently rolling

6a <2m silt and clay over till, abundant circular ridges 1m high.

5 Meltwater stream deposits: formed primarily by meltwater from stagnating ice flowing off Turtle Mountain; includes alluvial fan and deltaic deposits.

5b predominantly sand and gravel

5a predominantly sand

GLACIAL

4 Ice contact sand and gravel: deposited between and over blocks of dead ice

3 Stagnation moraine:

3b till, hummocks up to 15 m high; includes organics and mud accumulating in Kettle lakes and sloughs.

3a till, on flanks of Turtle Mountain; includes colluvial and alluvial sediments, primarily sand, silt and clay.

2 Ground moraine:

2b till, rolling plain, relief 1 - 3 m

2a till, modified by water erosion, includes minor silt and clay.

1 Corrugated moraine: till, subcarate ridges, concave northwest, relief 1 - 5 m; includes organic deposits.

Symbols

-  Beach ridge
-  Meltwater channel
-  Meltwater stream
-  Sand and gravel pit
-  Bedrock outcrop
-  .900 Field station; sample - S (Site number prefix: HO)
-  .400 Backhoe station; sample - S (Site number prefix: HB)
-  .001 Till section; sample - S (Site number prefix: HT)
-  11701 Deposit number
