Informational Notice 22-01

March 18, 2022

AVERAGE WELL HEAD PRESSURE

Section 120 of the Drilling and Production Regulation ('Regulation') requires a licensee of a well that is used for injection or disposal of water or other substance to file a report that is acceptable to the registrar. The report must contain the average wellhead injection pressure for each disposal or injection well at the end of the month covered by the report.

The new Avg. Pressure field will be available to users in Petrinex on April 6, 2022 to align with the mandatory reporting requirements as of the 2022-03 production month.

Any questions on the new Avg. Pressure field can be emailed to petroleum@gov.mb.ca.
