

# TORC OIL & GAS LTD.

EAST MANSON UNIT #1

ENHANCED OIL RECOVERY (EOR) ANNUAL REPORT

## **Discussion**

East Manson #1 delivered another year of steady flood performance throughout 2019. In its sixth year of operation since inception, this flood continued to show that injection conformance has been effective in arresting production decline and providing sufficient pressure maintenance to the reservoir.

The application of Iron Sulfide reducing chemical treatments to enhance injection volumes was continued where required throughout the year. These chemical applications continued to provide a means by which injection could be enhanced in a cost effective manner. FeS Reducer chemical injection at the north and south ends of our field was setup in 2015, and has been continued through 2019. Reduced chemical circulation frequency on our injection wells suggests that this is proving effective in reducing the amount of released iron in the injection system. Continuous sampling of the water in two production tanks at the battery still show little or no FeS.
