Attention: Mr. Dan Barchyn

Dear Dan:

Re: Over-Production Tundra Daly 5-13-10-29 (WPM)

The maximum permissible production rate per well for the Daly Bakken D Pool is 240 m³ of clean oil per month. This letter is to advise you that the well Tundra Daly 5-13-10-29 has accumulated over-production of 362.6 m³ as of March 1, 1990.

Please submit to the Petroleum Branch by May 8, 1990 your plans to retire the over-production.

Yours truly,

A handwritten signature in black ink, appearing to be 'J. N. Fox', with a long horizontal line extending to the right.

John N. Fox
Chief Petroleum Engineer
Petroleum Branch
