WASKADA
UNIT NO. 6

WATERFLOOD

APPLICATION

Dear George:

**Re: Waskada Unit No. 6
Application to Convert Wells to Water Injection**

Your application to convert the 9-1-1-26 (WPM), 1-12-1-26 (WPM) and 3-12-1-26 (WPM) wells to water injection in Waskada Unit No. 6 has been approved. Attached is Waterflood Order No. 1 outlining conditions for operation of the waterflood in Waskada Unit No. 6. Waterflood Order No. 1 issued under The Oil and Gas Act replaces Board Order No. PM 44. Also attached are approved copies of the applications to convert the wells.

If you have any questions please don't hesitate to call the undersigned at 945-6574.

Yours truly,

John N. Fox, P.Eng.
Chief Petroleum Engineer

cc. Waskada/Virden

**MINISTERIAL ORDER
WATERFLOOD ORDER NO. 1**

**Pertaining to Waterflood Operations
in Waskada Unit No. 6**

- 1.0 The Unit Operator shall conduct waterflood operations by injecting water into the Lower Amaranth Formation underlying Waskada Unit No. 6 ("the Unit") through the wells listed in Schedule A. The Director may approve the conversion of additional wells in the Unit to water injection.
- 1.1 Every injection well shall be completed as approved under Section 47 of the Drilling and Production Regulation.
- 1.2 The maximum wellhead pressure at which water may be injected is 10 000 kPa.
- 1.3 The Director may, from time to time , establish a maximum or minimum rate at which water may be injected into a well.
- 1.4 The annulus of each injection well shall be pressure tested in accordance with Section 50 of the Drilling and Production Regulation.
- 2.0 The Unit Operator shall conduct an annual survey to determine the level and distribution of reservoir pressure in the Unit. A summary of the results of any pressure surveys conducted during the year are to be included in the annual waterflood progress report required under Section 73 of the Drilling and Production Regulation.
- 2.1 The frequency of pressure surveys may be reduced where the Director is satisfied that more frequent surveys will not assist the Unit Operator in monitoring the effectiveness of the waterflood.
- 2.2 The Unit Operator is responsible for monitoring the effectiveness of the waterflood and for collecting such reservoir data and other information as is necessary to evaluate and optimize waterflood performance.
- 2.3 The Unit Operator is to advise the Petroleum Branch of the suspension of water injection at any well, any indication of channelling or breakthrough of injected water to a producing well or out of zone and any other detrimental effects that may be attributable to the waterflood operations.

- 3.0 The Unit Operator shall file a report of production or injection for each well in the Unit in accordance with Section 120 of the Drilling and Production Regulation.
- 4.0 The Oil and Natural Gas Conservation Board Order No. PM 44 dated May 13, 1985 is rescinded.

Memorandum

To L.R. Dubreuil
Director
Petroleum Branch

From John N. Fox,
Chief Petroleum Engineer
Petroleum Branch

Subject Waskada Unit No. 6
Conversion of Additional Wells to Water Injection

Notice of Tundra's application (attached) to convert the 9-1-1-26, 1-12-1-26 and 3-12-1-26 wells in Waskada Unit No. 6 to water injection was sent directly to offsetting royalty and working interest owners. No objections to or interventions in the application were received by the April 28, 1995 deadline.

Therefore it is recommended that the application be approved and Waterflood Order No. 1 be issued by the Director.

A handwritten signature in dark ink, appearing to be 'J. N. Fox', written in a cursive style.

April 5, 1995

NOTICE UNDER THE OIL AND GAS ACT

Waskada Unit No. 6 Application to Convert Additional Wells to Water Injection

Tundra Oil and Gas Ltd., the Unit Operator of Waskada Unit No. 6 ("the Unit") has made application under The Oil and Gas Act to convert the following wells in the Unit to water injection: 9-1-1-26 (WPM), 1-12-1-26 (WPM) and 3-12-1-26 (WPM).

If you have any questions or require any further information regarding the application, you may contact the Petroleum Branch at (204) 945-6574 or the company at:

Tundra Oil and Gas Ltd.
1111 - One Lombard Place
Winnipeg MB R3B 0X4
(204) 934-5850

A copy of the application can be viewed at the offices of the Petroleum Branch in Winnipeg and Waskada.

If no valid objection or intervention is received in writing at the Petroleum Branch, Suite 360 - 1395 Ellice Avenue, Winnipeg, Manitoba, R3G 3P2 by April 28, 1995, the Director may approve the application.

L.R. Dubreuil
Director of Petroleum

Memorandum

Date: April 5, 1995

To: Bob Dubreuil
Director
Petroleum Branch

From: John N. Fox
Chief Petroleum Engineer
Petroleum Branch

Subject: **Waskada Unit No. 6**
- Conversion of Additional Wells to Injection

Tundra Oil and Gas Ltd., Unit Operator of Waskada Unit No. 6, has applied to convert three additional wells to injection 9-1-1-26, 1-12-1-26 and 3-12-1-26.

Recommendations

It is recommended that notice of the application be sent directly to the working interest owners in:

SW/4 Section 6-1-25
NW/4 Section 1-1-26
S/2 Section 12-1-26

If there are no objections to the application, it is recommended that the application be approved by the Director (authority delegated under Section 72 of the regulation). Waterflood Order No. 1 approving waterflood operations in Waskada Unit No. 6 is attached. Waterflood Order No. 1 rescinds Board Order No. PM 44 (May 13, 1985).

Discussion

Tundra plans to convert injection in Waskada Unit No. 6 from the current inverted 9-spot injection pattern to an inverted 5-spot injection pattern. The company plans to do this in two stages, converting the 9-1-1-26, 1-12-1-26 and 3-12-1-26 wells in 1995 and converting the 9-12-1-26 and 3-18-1-25 wells after the response from the initial conversions is reviewed. Figure 1 shows the current and proposed injection pattern.

Tundra believes pressure and production data indicates poor volumetric sweep efficiency in the Lower Amaranth. Pressure surveys (Fig. 2) indicate an average unit reservoir pressure of 6032 kPa, almost 3000 kPa below original reservoir pressure. As shown on Figure 2 the southern portion of the unit does not appear to be receiving adequate pressure support from the current injectors. Though the current VVR is 1.97 (1994), Tundra feels as much as 80% of the injected water is going out of zone into the underlying Mission Canyon zone.

Tundra believes increasing the ratio of injectors to producers will increase the volume of water injected into the Lower Amaranth and result in the recovery of bypassed reserves. Tundra has estimated conversion of the 9-1, 1-12 and 3-12 wells to injection will result in incremental recoverable reserves of 10,935 m³, increasing recovery from the Unit from 18.3% OOIP to 19.1% OOIP.

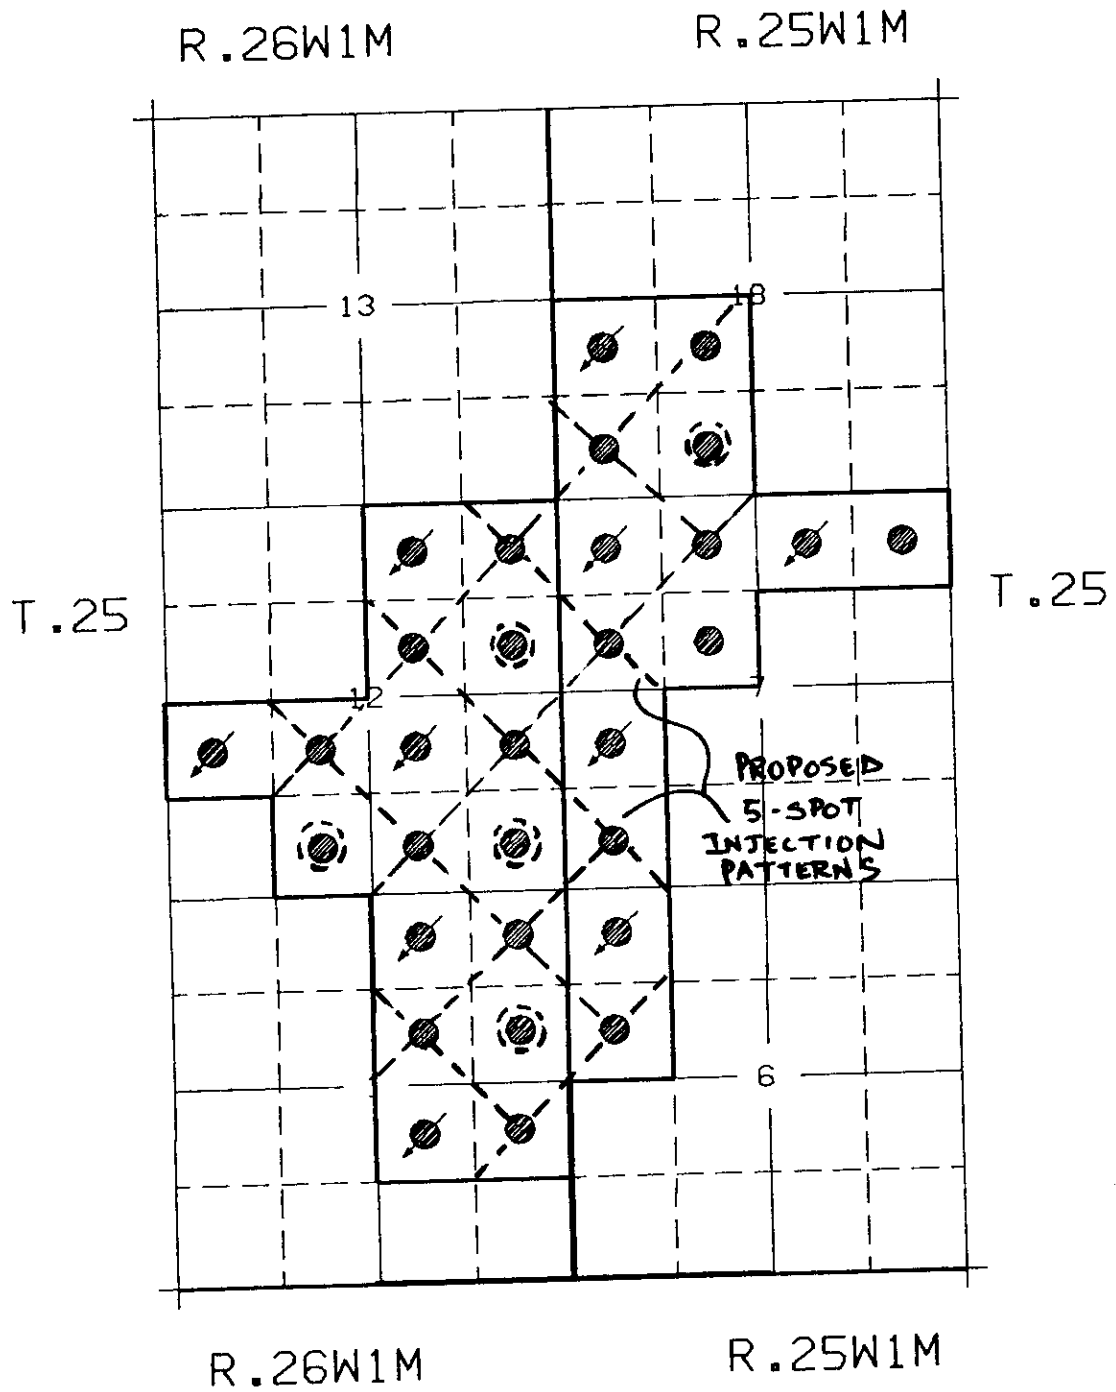

Tundra has provided the names of the royalty and working interest owners within 0.5 km of the proposed conversions. The owners in the SW/4 of Sec. 6-1-25, NW/4 of Sec. 1-1-26 and the S/2 of Sec. 12-1-26 lands will be notified directly of the application. A copy of the proposed notice of the application is attached.

If there are no objections to the application, it is recommended that the application be approved by issuing Waterflood Order No. 1 under The Oil and Gas Act. Waterflood Order No. 1 (attached) rescinds Board Order No. PM 44.

A handwritten signature in black ink, consisting of a stylized 'J' and 'F' followed by a large, loopy flourish.

Dear Mr. Smart:

RE: CONVERSION TO WATER INJECTION WELL
Surface Lease dated October 5, 1982
TWP 1 RGE 26 WPM: LSD 9 SEC 1
Our File(s): 1284

This letter is to advise that Tundra Oil and Gas Ltd. intends to convert the subject well to a water injection well in order to provide additional waterflood support for Waskada Unit #6. We expect the conversion to be completed in June or July of this year.

In order to obtain the government's approval to the conversion, we require your approval as the surface owner. Would you please indicate your consent by signing, dating and returning one copy of this letter in the envelope provided at your earliest convenience.

Thank you for your prompt attention to this matter. Should you have any further questions, please do not hesitate to call.

Sincerely,

TUNDRA OIL AND GAS LTD.

Manitoba Energy and Mines
Petroleum Branch
1395 Ellice Avenue, Suite 360
Winnipeg, Manitoba
R3G 0G3

Attention: **Mr. J. Fox, P.Eng.**
Chief Petroleum Engineer

Dear John,

RE: Waskada Unit No.6
1994 Progress Report
Application to Convert 9-1-1-26, 1-12-1-26, and 3-12-1-26 to
Water Injection Service

Please find attached the following information in support of Tundra's application to convert the referenced wells to injection service:

- (1) Progress Report January 1, 1994 to December 31, 1994
- (2) Individual well applications to convert 9-1-1-26, 1-12-1-26, and 3-12-1-26 to water injection service.
- (3) Detailed well operations programs to convert the referenced wells to injection service.
- (4) Letters notifying surface owners of proposed operations at the referenced well locations.

Yours truly,

TUNDRA OIL AND GAS LTD.

George Czyzewski, P.Eng.
Senior Reservoir Engineer

Dear Mr. Smart:

RE: CONVERSION TO WATER INJECTION WELL
Surface Lease dated October 5, 1982
TWP 1 RGE 26 WPM: LSD 9 SEC 1
Our File(s): 1284

This letter is to advise that Tundra Oil and Gas Ltd. intends to convert the subject well to a water injection well in order to provide additional waterflood support for Waskada Unit #6. We expect the conversion to be completed in June or July of this year.

In order to obtain the government's approval to the conversion, we require your approval as the surface owner. Would you please indicate your consent by signing, dating and returning one copy of this letter in the envelope provided at your earliest convenience.

Thank you for your prompt attention to this matter. Should you have any further questions, please do not hesitate to call.

Sincerely,

TUNDRA OIL AND GAS LTD.

Suzanne R. Toews
Land Administrator
