## **Community Overview**

### **History**

The original settlement was established by the Hudson's Bay Company in 1818 and is listed as one of the posts occupied at the time of merging with the North West Company. The community consists of a group of islands near the north shore of Island Lake which include: Stevenson, Wass, Hamilton, Boothe, Chapins, RC Mission, Gravel and Lindsays. These Islands are quite close to the Garden Hill First Nation.

### **Access**

The community is 412 air kilometres (km) northeast of Winnipeg and 260 air km southeast of Thompson.

### **Governance**

The community is represented by a mayor and council under The Northern Affairs Act.

### **Economic Overview**

Located in the Precambrian Shield region, small to medium deposits of lithium and nickel have been found and magnetic anomalies indicate further reserves. Bighorn Development Corporation at the Island Lake Ministic Site undertook rehabilitation of the Ministic gold mine shaft on the main vein. Diamond drilling in 1987 explored the Climpy and Rex veins. Active mineral exploration continues for other base metals, copper, zinc and additional gold reserves. Trapping and fishing provide income to the local economy. Sport fishing and hunting form the basis for some tourist operations. Island Lake is still a focal point in terms of the Northern Store and service sector.
