Collection Spotlight: Winter Trail Maps

These maps and others, produced by Manitoba Conservation and Water Stewardship, provide information about [cross-country ski trails](#), [snowshoe trails](#), [warming huts](#), [winter walking trails](#) and [snowmobile trails](#) in various provincial parks.

Librarian's Picks

If mayors ruled the world : dysfunctional nations, rising cities / Benjamin R. Barber. New Haven : Yale University Press, 2013. xv, 416 pages.
JS 141 Bar

From **Kirkus Reviews**:

Political theorist Barber [...] asks whether the world's cities, and the mayors who lead them, can come together as an alternative to the failures of the nation-state. The author not only provides a positive answer, he also discusses how cities and their mayors have already collaborated for a variety of purposes and assesses the characteristics that make leagues or confederations of cities potentially viable as broader networks.

Barber has no patience for the successors of Rousseau or Thomas Hardy whose "pastoral nostalgia leads them to curse the wickedness of cities." He contends that cities can provide a framework for a globalization that is "public rather than private, democratic not hegemonic, egalitarian rather than monopolistic." A parliament of cities is already emerging. In his view, the nation-state is incapable of cooperating on global issues with other states, since global cooperation violates the institutional foundation of nations. Citing historical precedents like the Hanseatic League, among others, Barber insists that local consensual problem-solving is a characteristic of mayoral offices and "seem[s] to override deficiencies in political landscape." The author reviews areas like security, the environment and global warming, and standard setting for service provisions to illustrate the many different ways in which the world's cities are coming together, and he features a multitude of organizations that have already been formed. Leaders who have stepped forward include New York's mayor Michael Bloomberg, Stuttgart, Germany's former mayor Wolfgang Schuster and the mayor/president of Singapore Tony Tan. A provocative, informative account of a different kind of globalization. Highly recommended reading for policymakers and other readers intrigued by forward-thinking forms of governance.

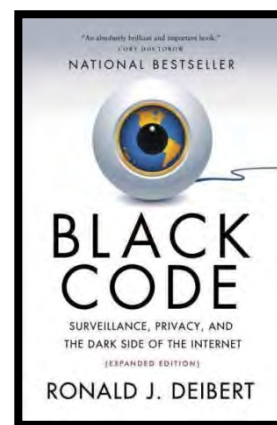

Black code : surveillance, privacy, and the dark side of the Internet / Ronald J. Deibert. Expanded edition., Trade paperback edition. Toronto : Signal, 2013. xvi, 320 pages.
HM 851 Dei

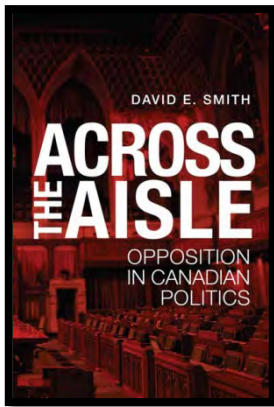

From **McNally Robinson**:

Cyberspace is all around us. We depend on it for everything we do. We have reengineered our business, governance, and social relations around a planetary network unlike any before it. But there are dangers looming, and malign forces are threatening to transform this extraordinary domain.

In *Black Code*, Ronald J. Deibert, a leading expert on digital technology, security, and human rights, lifts the lid on cyberspace and shows what's at stake for Internet users and citizens. As cyberspace develops in unprecedented ways, powerful agents are scrambling for control. Predatory cyber criminal gangs such as Koobface have made social media their stalking ground. The discovery of Stuxnet, a computer worm reportedly developed by Israel and the United States and aimed at Iran's nuclear facilities, showed that state cyberwar is now a very real possibility. Governments and corporations are in collusion and are setting the rules of the road behind closed doors.

This is not the way it was supposed to be. The Internet's original promise of a global commons of shared knowledge and communications is now under threat. Drawing on the first-hand experiences of one of the most important protagonists in the battle -- the Citizen Lab and its global network of frontline researchers, who have spent more than a decade cracking cyber espionage rings and uncovering attacks on citizens and NGOs worldwide -- *Black Code* takes readers on a fascinating journey into the battle for cyberspace. Thought-provoking, compelling, and sometimes frightening, it is a wakeup call to citizens who have come to take the Internet for granted. Cyberspace is ours, it is what we make of it, Deibert argues, and we need to act now before it slips through our grasp.

Across the aisle : opposition in Canadian politics / David E. Smith. Toronto : University of Toronto Press, 2013. xiii, 228 pages.
JL 167 Smi

From the **University of Toronto Press:**

How do parties with official opposition status influence Canadian politics? *Across the Aisle* is an innovative examination of the theory and practice of opposition in Canada, both in Parliament and in provincial legislatures. Extending from the pre-Confederation era to the present day, it focuses on whether Canada has developed a coherent tradition of parliamentary opposition.

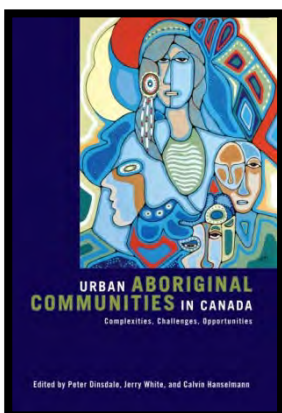

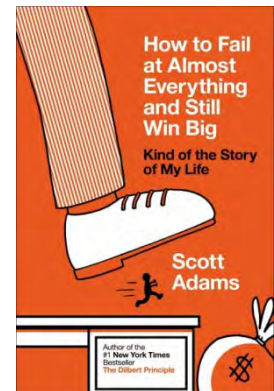

David E. Smith argues that Canada has in fact failed to develop such a tradition. He investigates several possible reasons for this failure, including the long dominance of the Liberal party, which arrested the tradition of viewing the opposition as an alternative government; periods of minority government induced by the proliferation of parties; the role of the news media, which have largely displaced Parliament as a forum for commentary on government policy; and, finally, the increasing popularity of calls for direct action in politics.

Readers of *Across the Aisle* will gain a renewed understanding of official opposition that goes beyond Stornoway and shadow cabinets, illuminating both the historical evolution and recent developments of opposition politics in Canada.

How to fail at almost everything and still win big : kind of the story of my life / Scott Adams. New York : Portfolio/Penguin, 2013. 248 pages.
PN 6727 .A3 Ada

From **Booklist Reviews** :

The creator of the Dilbert comic strip is also the author of several nonfiction books that apply Dilbert's philosophy to the workplace. Here he takes an autobiographical approach, using his own life to illustrate his thesis that failure isn't necessarily a bad thing. Adams' own list of failures is—given his spectacular success as a cartoonist—surprisingly lengthy: a couple of unsuccessful restaurants as well as computer games, inventions, and online businesses that all tanked. Adams isn't bummed by any of his flops because—and this is the key element of his philosophy—you learn by trying, not by succeeding. And every failure in life helps point us in the direction of ultimate success. (Adams says he would never have become a cartoonist if it weren't for a combination of personal failures and the successes of some of his friends, who were willing to take personal risks.) Readers familiar with the author's previous nonfiction will note the same easygoing, conversational style here, an approach that works perfectly for blending humor with serious advice.

Urban Aboriginal communities in Canada : complexities, challenges, opportunities / edited by Peter Dinsdale, Jerry White, and Calvin Hanselmann. Toronto : Thompson Educational Pub., 2011. xii, 296 p.
E 78 .C2 Urb

From **Thompson Educational Publishing:**

The majority of Canada's Aboriginal peoples live in urban areas, yet scholarly work on Aboriginal issues continues to focus on reserve-based communities. In contrast, this collection of papers provides a comprehensive portrait of the country's urban Aboriginal population—a population defined by both great promise and great challenges.

Using data from the 2006 census, the authors draw on the urban catchment or service area, a custom unit of geography, to examine over three hundred non-reserve communities with significant numbers of Aboriginal residents. By doing so, they capture the urban Aboriginal dynamic in a way that existing data and analysis do not.

New titles to borrow

Aboriginal Peoples

1. ***Reconciling sovereignties : Aboriginal nations and Canada*** / Felix Hoehn. Saskatoon : Native Law Centre, University of Saskatchewan, 2012. xi, 169 p.
KE 7709 Hoe
