

# MANITOBA TRADE UPDATE

## FOURTH QUARTER, 2024

### Manitoba Exports

Manitoba exported \$20,568.0 million worth of merchandise to the rest of the world from January to December of 2024. This was \$901 million (-4.2%) less than the \$21,468.7 million exported during the same period in 2023.

Manitoba's exports to the United States (U.S.), which account for 70.3% of all exports, decreased by \$1,016 million (-6.6%). Meanwhile, exports to China, Manitoba's second-largest trading partner with a share of 7.7%, decreased by \$195 million (-11.0%). Manitoba's exports to the third largest trading partner, Japan, rose \$124 million (+15.1%).

Around half of all U.S. exports went to Midwestern states, decreasing by 0.2% on a year-to-date basis to \$7,174.8 million. One-fifth of U.S. exports went to Southwestern states, a decrease of \$1,058 million (-27.0%) over the same period, mostly due to a decline in pharmaceutical-related exports to Tennessee. Exports to Western states had the largest year-to-date increase, rising by \$47 million (+2.8%).

Agriculture exports decreased by \$160 million (-3.4%) due to a reduction in selected crop prices compared to last year. This included a decrease in wheat exports by \$155 million (-8.9%) and rape or colza seeds (whether or not broken) by \$316 million (-22.2%). Offsetting this were exports of meat of swine, which increased by \$224 million (+18.2%).

Manufactured product exports fell by \$821 million (-5.6%). The largest valued commodities contributing to this sector included: 1) Packaged medicines in specific doses for retail, down \$943 million (-40.4%), as the U.S. purchased less from Manitoba; 2) Pork, fresh, chilled, or frozen, up \$224 million (+18.2%) due to increased demand from Japan; 3) Unmodified canola, colza, or mustard oil and their parts, down \$316 million (-22.2%) as the export value to the U.S. fell due to a decrease in price.

### Manitoba Imports

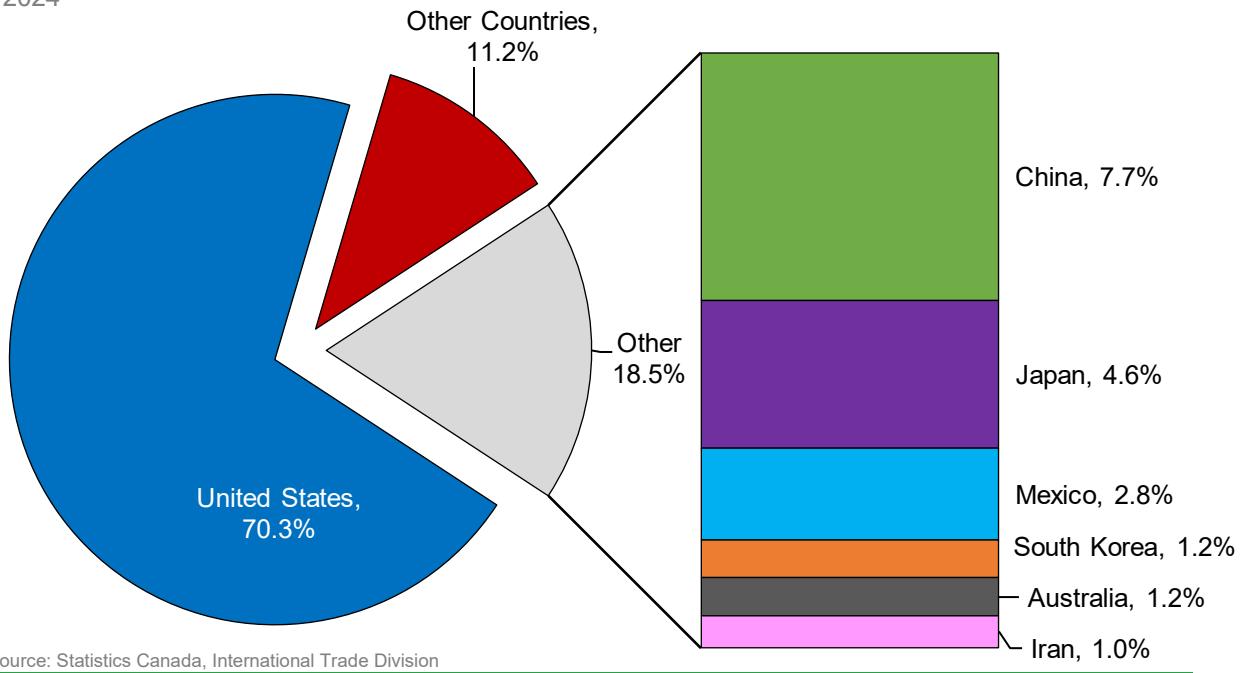

Manitoba's imports were valued at \$30,767.3 million worth of merchandise from the rest of the world from January to December of 2024, up \$150 million, or 0.5% more than was imported in the same period last year.

Nearly 75% of Manitoba's internationally imported goods come from the U.S., down \$179 million (-0.8%) on a year-to-date basis. China is Manitoba's second-largest trading partner, accounting for 5.4% of imports, which fell by \$38 million (-2.2%). Mexico, Manitoba's third largest trading partner, saw the value of imported goods increase by \$129 million (+9.4%).

Manitoba's imports of manufacturing products grew by \$368 million (+1.3%) on a year-to-date basis ending in December 2024. Over 90% of all international imports into Manitoba are manufacturing-related. Key commodities contributing to Manitoba's imports included: 1) Turbo-jets, turbo-propellers and other gas turbines, up \$436 million (+39.9%); 2) Motor vehicles for passenger transport (other than buses transport), down \$222 million (-23.6%); 3) Self-propelled bulldozers, scrapers, graders, levelers, etc, down \$215 million (-25.4%).

## Note to Readers

The Manitoba Bureau of Statistics (MBS) has prepared this report as part of its economic statistics program. The purpose is to provide Manitoba-level information on the importance and impact of international merchandise trade.

This publication provides merchandise export and import statistics by country, country grouping, commodity and industry. The information is from Statistics Canada's International Trade Division.

MBS adjusts the value of exports for some commodities in its Manitoba Economic Accounts. These adjustments are undertaken to better reflect the value of the foreign export of these commodities to the provincial economy.

Users should be aware that the export data is on a "province of origin" basis, while the import data is on a "province of clearance" basis. Therefore, imports from other countries are not counted if they are cleared through custom ports in other provinces and then shipped to Manitoba (MBS would count these as interprovincial imports). This implies that the trade balances calculated for individual countries could overstate Manitoba's actual position.

As part of the 2022 World Customs Organization (WCO) amendments, a number of codes have been terminated and recoded. Updates at the 6-digit level are made every 5 years by the WCO, in order to reflect new international standards and trade patterns. While all commodity data presented in this report are based on the 4-digit level Harmonized System (HS) codes, the information presented may be affected by these changes.

All industry data presented in this report are based on the North American Industry Classification System (NAICS) and are derived from HS code values. The concordance file used in converting the commodity data into industry values is derived from Statistics Canada. With the emergence of HS 2022 codes, revisions to this concordance file have since been maintained by MBS. As a result, there may be discrepancies in the industry details within this report when compared to other industry-based data sources.

MBS can provide additional detailed export/import information to users upon request, which includes:

- i) individual commodities for specific countries.
- ii) individual commodities by country (volume and dollar value) at the 4, 6, 8, or 10 digit HS level.
- iii) commodities by country for specific industries or sectors.

The data presented in this report has been derived from the most current estimates released by Statistics Canada's International Trade Division. Revisions for 2022 and 2023 calendar years have been incorporated in this report.
