

# QUARTERLY POPULATION STATISTICS REPORT

## Manitoba Population Estimates: July 1, 2024

Statistics Canada has released its July 1, 2024 population estimates and second quarter 2024 demographic estimates for Canada, the provinces, and territories.

According to Statistics Canada, Manitoba's total population was estimated at 1,494,301 residents as of July 1, 2024, up 8,346 individuals (0.56%) from the April 1, 2024 estimate. Population growth continues on a twelve-month basis, with Manitoba's increase since July 1, 2023 estimated at 39,558 people, or 2.72%. Among similar twelve-month periods, Manitoba's growth rate is second highest in modern times, fueled by strong net international and other international inflows. Although considerably less severe than the previous twelve-month period, net interprovincial outflows continue to hamper growth.

	July 1, 2024	April 1, 2024	July 1, 2023
<b>Population</b>	1,494,301	up 8,346	up 39,558
<b>Net Migration (January to June)</b>		<b>2024</b>	<b>2023</b>
<b>International</b>		12,074	13,427
<b>Other International*</b>		7,026	12,309
<b>Interprovincial</b>		-1,018	-5,004
<b>Total</b>		18,082	20,732

*\*Note: Other International is Net Non-permanent Residents, plus Returning Emigrants (short-term and long-term)*

Net international migration (immigrants minus short-term and long-term emigrants) for the first two quarters of 2024 was 12,074 individuals, down from 13,427 people in the first two quarters of 2023. Other international migration (that is, the net change in non-permanent residents plus the number of short-term and long-term returning emigrants) accounted for an estimated net gain of 7,026 migrants for the first two quarters of 2024. This net gain is smaller than the net gain of 12,309 other international migrants estimated for the first two quarters of 2023.

Through interprovincial migration, Manitoba recorded an estimated net loss to other provinces and territories of 1,018 residents during the first two quarters of 2024. This net loss is smaller than the net loss of 5,004 individuals in the first two quarters of 2023. During the first two quarters of 2024, Manitoba's largest net gains were from Ontario (667), Quebec (74) and Nunavut (70). The largest net losses were to Alberta (-1,354), British Columbia (-147) and Saskatchewan (-118).

Generally, Manitoba's interprovincial migration losses are offset to some degree by other forms of migration. Combining the various forms of population movement, Manitoba recorded an overall net migration gain of 18,082 people in the first two quarters of 2024. This net gain marked a decrease of 2,650 individuals from the net gain of 20,732 migrants in the first two quarters of 2023.

Statistics Canada has released revised demographic estimates for the third quarter 2021 onward. This MBS report incorporates all revisions.

Tables 6, 7 and 8 present the differences between the current estimates and those previously published by Statistics Canada for Tables 1, 2 and 4.

(1) From the third quarter of 1996 to the second quarter of 2016, "Other" includes Net Non-permanent Residents and Returning Emigrants less Net Temporary Emigrants (formerly called Temporary Abroad). From third quarter 2016 onward, short-term Emigrants and short-term Returning Emigrants are included with Emigrants and Returning Emigrants respectively, and the Net Temporary Emigrant component is no longer being provided.

(2) Prior to the third quarter of 2016, Emigrants included long-term Emigrants only. From the third quarter of 2016 onward, both long-term and short-term Emigrants are included, making the data not strictly comparable.

Note: Annual components of growth are for Jan. 1 to Dec. 31 of given year, population is for July 1 of given year. Quarterly population figures are for the end of the period indicated.

(1) From the third quarter of 1996 to the second quarter of 2016, "Other" includes Net Non-permanent Residents and Returning Emigrants less Net Temporary Emigrants (formerly called Temporary Abroad). From third quarter 2016 onward, short-term Emigrants and short-term Returning Emigrants are included with Emigrants and Returning Emigrants respectively, and the Net Temporary Emigrant component is no longer being provided.

(2) Prior to the third quarter of 2016, Emigrants included long-term Emigrants only. From the third quarter of 2016 onward, both long-term and short-term Emigrants are included, making the data not strictly comparable.

Note: Annual components of growth are for Jan. 1 to Dec. 31 of given year, population is for July 1 of given year. Quarterly population figures are for the end of the period indicated.

## Notes to Readers

### Population Estimate

Estimates are derived from Census counts, but are adjusted for net Census undercoverage, incompletely enumerated Indian reserves and demographic growth.

### Other International Migration

Other International Migration groups together some of the more temporary international migration flows and is comprised of the net change in Non-permanent Residents, plus long-term and short-term Returning Emigrants.

### Non-permanent Residents

The majority of **Non-permanent Residents** are students and temporary workers, while the remainder are refugee status claimants and non-Canadian born dependents of refugee claimants or permit holders.

### Residual

**Residual deviation** is obtained by distributing the error of closure linearly throughout the intercensal period.

The **error of closure** is defined as the difference between the final postcensal population estimates on Census Day and the most recent Census counts (adjusted for Census net undercoverage and incompletely enumerated reserves and settlements).

A positive error of closure means that the postcensal population estimates have overestimated the population. A negative residual would then be required to correct the overestimation.

### Gains and Losses

Manitoba is considered to have a **net gain** when the number of people moving in from a given province or territory is greater than the number moving out, otherwise the **net interchange** is considered to be a **loss**.

Example: Say 28 people moved from Manitoba to Ontario and, over the same time period, 10 people moved from Ontario to Manitoba. Manitoba's resulting net interchange with Ontario would be a loss of 18 people.

### Comparability over time

Estimates of population and demographic components may not be fully comparable over time due to seasonal effects, changes in methodologies and completeness of source data.

## Methodology Adjustments

### Regarding COVID-19

On March 18, 2020 the Government of Canada implemented travel restrictions aimed at reducing the spread of COVID-19. In order to try and account for the restrictions imposed by Canada, and other countries, Statistics Canada adjusted their usual estimation methods for Emigrants (long-term and short-term) and Returning Emigrants (long-term and short-term). Beginning in 2021, as COVID-19 related travel restrictions started to lift, Statistics Canada modified their methodology adjustments to reflect a return towards pre-pandemic migration levels.

From the first quarter 2022 onward, Statistics Canada has returned to their usual estimation methods for Emigrants and Returning Emigrants. However, slight modifications are being made to ensure that pandemic effects are not carried forward into future estimates. No other COVID-19 related adjustments are being made at this time.

### Birth Registration Delays

Birth estimation methods have been adjusted for Manitoba (2021 and 2022 calendar years) and Nova Scotia (August to December 2021) due to data completeness issues.

## Canada-Ukraine Authorization for Emergency Travel (CUAET)

Since March 17, 2022, persons with a Canada-Ukraine authorization for emergency travel who are on Canadian soil are included in the Net Non-permanent Resident estimates.

## Effective with the September 2024 release

### Non-permanent Residents

From July 2021 onward, estimation methods for non-permanent residents have been adjusted to better account for the province/territory of residence for asylum claimants, protected persons and members of related groups.

## Effective with the September 2023 release

### Census Base

Postcensal estimates are based on the 2021 Census counts adjusted for census net undercoverage and for incompletely enumerated reserves and settlements.

### Emigration and Returning Emigration

Emigrants and Returning Emigrants include both long-term and short-term migrants from July 2016 onward. Prior to July 2016, only long-term migrants are included.

### Net Temporary Emigration

From July 2016 onward, short-term Emigrants and short-term Returning Emigrants are included with Emigrants and Returning Emigrants respectively, and the Net Temporary Emigrant component is no longer being provided. Prior to July 2016, short-term Emigrants and short-term Returning Emigrants were accounted for as Net Temporary Emigrants, part of the Other International Migration component.

### Non-permanent Residents

From July 2021 onward, estimation methods for non-permanent residents have been adjusted to better account for open work permits without a province/territory of intended destination, permit processing delays and dependents of permit-holders.
