

QUARTERLY POPULATION STATISTICS REPORT

Manitoba Population Estimates: January 1, 2025

Statistics Canada has released its January 1, 2025 population estimates and fourth quarter 2024 demographic estimates for Canada, the provinces, and territories.

According to Statistics Canada, Manitoba's total population was estimated at 1,504,023 residents as of January 1, 2025, up 4,042 individuals (0.27%) from the October 1, 2024 estimate. Population growth continues on a twelve-month basis, with Manitoba's increase since January 1, 2024 estimated at 28,977 people, or 1.96%. Among similar twelve-month periods, Manitoba's growth rate is third highest in modern times, fueled by strong net international and other international inflows. Although interprovincial migration continues to hamper growth, the twelve-month net outflow is the smallest since 2010.

	January 1, 2025	October 1, 2024	January 1, 2024
Population	1,504,023	up 4,042	up 28,977
Net Migration	(January to December)	2024	2023
International		21,102	21,420
Other International*		8,140	26,798
Interprovincial		-2,987	-8,526
Total		26,255	39,692

**Note: Other International is Net Non-permanent Residents, plus Returning Emigrants (short-term and long-term)*

Net international migration (immigrants minus short-term and long-term emigrants) for 2024 was 21,102 individuals, down from 21,420 people in 2023. Other international migration (that is, the net change in non-permanent residents plus the number of short-term and long-term returning emigrants) accounted for an estimated net gain of 8,140 migrants for 2024. This net gain is 3.3 times smaller than the net gain of 26,798 other international migrants estimated for 2023.

Through interprovincial migration, Manitoba recorded an estimated net loss to other provinces and territories of 2,987 residents during 2024. This net loss is 2.9 times smaller than the net loss of 8,526 individuals in 2023. During 2024, Manitoba's largest net gains were from Ontario (986), Nunavut (127) and New Brunswick (11). The largest net losses were to Alberta (-2,993), British Columbia (-901) and Saskatchewan (-120).

Generally, Manitoba's interprovincial migration losses are offset to some degree by other forms of migration. Combining the various forms of population movement, Manitoba recorded an overall net migration gain of 26,255 people in 2024. This net gain marked a decrease of 13,437 individuals from the net gain of 39,692 migrants in 2023.

Notes to Readers

Population Estimate

Estimates are derived from Census counts, but are adjusted for net Census undercoverage, incompletely enumerated Indian reserves and demographic growth.

Other International Migration

Other International Migration groups together some of the more temporary international migration flows and is comprised of the net change in Non-permanent Residents, plus long-term and short-term Returning Emigrants.

Non-permanent Residents

The majority of **Non-permanent Residents** are students and temporary workers, while the remainder are refugee status claimants and non-Canadian born dependents of refugee claimants or permit holders.

Residual

Residual deviation is obtained by distributing the error of closure linearly throughout the intercensal period.

The **error of closure** is defined as the difference between the final postcensal population estimates on Census Day and the most recent Census counts (adjusted for Census net undercoverage and incompletely enumerated reserves and settlements).

A positive error of closure means that the postcensal population estimates have overestimated the population. A negative residual would then be required to correct the overestimation.

Gains and Losses

Manitoba is considered to have a **net gain** when the number of people moving in from a given province or territory is greater than the number moving out, otherwise the **net interchange** is considered to be a **loss**.

Example: Say 28 people moved from Manitoba to Ontario and, over the same time period, 10 people moved from Ontario to Manitoba. Manitoba's resulting net interchange with Ontario would be a loss of 18 people.

Comparability over time

Estimates of population and demographic components may not be fully comparable over time due to seasonal effects, changes in methodologies and completeness of source data.

Methodology Adjustments

Regarding COVID-19

On March 18, 2020 the Government of Canada implemented travel restrictions aimed at reducing the spread of COVID-19. In order to try and account for the restrictions imposed by Canada, and other countries, Statistics Canada adjusted their usual estimation methods for Emigrants (long-term and short-term) and Returning Emigrants (long-term and short-term). Beginning in 2021, as COVID-19 related travel restrictions started to lift, Statistics Canada modified their methodology adjustments to reflect a return towards pre-pandemic migration levels.

From the first quarter 2022 onward, Statistics Canada has returned to their usual estimation methods for Emigrants and Returning Emigrants. However, slight modifications are being made to ensure that pandemic effects are not carried forward into future estimates. No other COVID-19 related adjustments are being made at this time.

Birth Registration Delays

Birth estimation methods have been adjusted for Manitoba (2021 and 2022 calendar years) and Nova Scotia (August to December 2021) due to data completeness issues.

Canada-Ukraine Authorization for Emergency Travel (CUAET)

Since March 17, 2022, persons with a Canada-Ukraine authorization for emergency travel who are on Canadian soil are included in the Net Non-permanent Resident estimates.

Effective with the September 2024 release

Non-permanent Residents

From July 2021 onward, estimation methods for non-permanent residents have been adjusted to better account for the province/territory of residence for asylum claimants, protected persons and members of related groups.

Effective with the September 2023 release

Census Base

Postcensal estimates are based on the 2021 Census counts adjusted for census net undercoverage and for incompletely enumerated reserves and settlements.

Emigration and Returning Emigration

Emigrants and Returning Emigrants include both long-term and short-term migrants from July 2016 onward. Prior to July 2016, only long-term migrants are included.

Net Temporary Emigration

From July 2016 onward, short-term Emigrants and short-term Returning Emigrants are included with Emigrants and Returning Emigrants respectively, and the Net Temporary Emigrant component is no longer being provided. Prior to July 2016, short-term Emigrants and short-term Returning Emigrants were accounted for as Net Temporary Emigrants, part of the Other International Migration component.

Non-permanent Residents

From July 2021 onward, estimation methods for non-permanent residents have been adjusted to better account for open work permits without a province/territory of intended destination, permit processing delays and dependents of permit-holders.
