

# POPULATION ESTIMATES BY CENSUS SUBDIVISION AND AGE GROUP

Winnipeg - July 2025

For statistical purposes, Manitoba's municipalities are grouped into eight Economic Regions (ER). Smaller than an Economic Region, Census Divisions are also formed by aggregating municipalities. Reference maps are provided on pages 9 and 10. The table below shows the association between Manitoba's Economic Regions and its Census Divisions.

The maps on pages 2 to 8 show selected demographic characteristics by Census Subdivision (CSD) within the Winnipeg Economic Region.

The following CSD type abbreviations are used:  
CY = City; RM = Rural municipality

Selected Demographic Characteristics for Manitoba - Gender Total (July 1, 2025)								Minimum	Maximum
Geography	Percent Share of Total (%)					Total	Percent Change (%) Year-over-Year	Median Age (Years)	
	14 and Under	15 to 64	65 and Over	12 and Over	18 and Over				
<b>Manitoba</b>	<b>17.7</b>	<b>65.1</b>	<b>17.2</b>	<b>86.1</b>	<b>78.6</b>	<b>1,509,702</b>	<b>1.2</b>	<b>37.6</b>

# Median Age by Census Subdivision - Winnipeg

July 1, 2025

**Winnipeg: 37.8 years**

- 5.5 years to ≤ 26.3 years (0)
- 26.4 years to ≤ 38.2 years (1)
- 38.3 years to ≤ 44.8 years (1)
- 44.9 years to ≤ 65.3 years (0)
- Not Available (0)

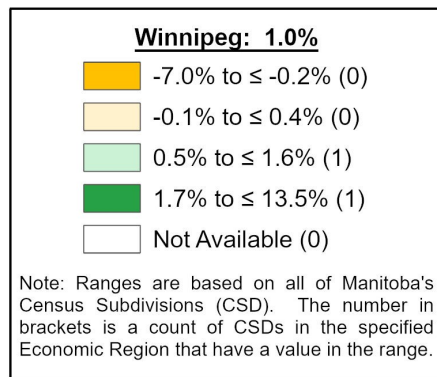

Note: Ranges are based on all of Manitoba's Census Subdivisions (CSD). The number in brackets is a count of CSDs in the specified Economic Region that have a value in the range.

## Notes to Readers

### Population Estimate

Estimates are derived from Census counts, but are adjusted for net Census undercoverage, incompletely enumerated Indian reserves and demographic growth.

### Median Age

The median age of the population is the age at which half the people are older, and half are younger.

### Gender

Gender refers to an individual's personal and social identity as a man, woman or non-binary person (a person who is not exclusively a man or a woman).

Demographic estimates are available for the gender category "Men+" (includes men and/or boys, as well as some non-binary persons), and for the gender category "Women+" (includes women and/or girls, as well as some non-binary persons). Prior to 2021, the demographic estimates are based on the concept of sex at birth. Although gender and sex at birth are two different concepts, this change does not cause a significant break in the trend because the two concepts produce very similar distributions.

### Comparability over time

Estimates of population and demographic components may not be fully comparable over time due to seasonal effects, changes in methodologies and completeness of source data.

### Data Subject to Revision

The initial release of demographic estimates should be considered preliminary. In subsequent annual releases, estimates are updated, or finalized, using the standard procedure followed by Statistics Canada for decades.

### Small number warning

Population estimates for Census Subdivisions (CSDs) sometimes consist of small numbers, particularly if broken down by age and gender. Estimates with such a high degree of detail may show a level of uncertainty that is more important. Thus, estimates for smaller numbers should be interpreted with caution. In order to reduce this level of uncertainty, users are encouraged to create age groups meeting their needs and/or to group together more than one CSD.

## Effective with the May 2024 release

### Census Base

Postcensal estimates are based on the 2021 Census counts adjusted for census net undercoverage and for incompletely enumerated reserves and settlements.

### Census Geography

This report contains population estimates for census subdivisions (CSDs) according to the Standard Geographical Classification (SGC) 2021.

## Coming Up

### Next Release

January 13, 2027

Population Estimates by Census Subdivision and Age Group for July 2026
