

March 28, 21

Dear Technical of this Co-ordination Unit,
I am a War - Bride of the Dickson
Family and have been renting a $\frac{3}{4}$
section in this land since my
husband died in the last century.
I've used # 422 a lot for travel and
in one flood we used it for our
Ecodna because of water in the Red
river. We always remarked on the
lovely homes, fields, gardens and
flowers along that Route.

My oldest son continued to
take me to continue taking me to
see the crops until last year. I now
use a walker and it's more difficult.
However I hope you can find some
other land for your people.

I hope the Red River Genetics
Group will consider my view.

Truly yours,
Mildred Dickson.
