
3.2M Horizontal Alignment

**3.2.6M Horizontal Alignment: Design Domain Additional Application
Heuristics**

3.2.6.4M Horizontal Alignment and Lateral Clearances: Application Heuristics

The TAC Subsection **3.2.6.4** is applicable to the Department's highways with the following addition:

4. On level terrain for design speeds up to 110 km/h, and Right-of-Way widths of 60 m, it has been determined that the lateral clearance requirements for stopping sight distance on horizontal curves will be met. For varying Right-of-Way widths on rolling or rugged terrain, lateral clearance requirements must be checked.
