

PTH 1 Twinning Conceptual Design Study

JANUARY 2025 PROJECT UPDATE

Over the past year, Manitoba Transportation and Infrastructure (MTI), Tetra Tech Canada Inc., and Landmark Planning & Design Inc. have been working internally on the conceptual design study for twinning the 16-kilometre section of the **TransCanada/Provincial Trunk Highway (PTH) 1** from Falcon Lake to the Manitoba-Ontario border.

MTI is continuing to work on this project and is currently in conversations with Indigenous Rights Holders, working to ensure all interests are carefully considered.

The Project Team intends to conduct a series of engagement meetings (Round 2A) to share viable corridor alternatives in the coming weeks. Once a preferred corridor is identified, MTI will look at specific alignment alternatives within that corridor. Please watch your local newspaper and MTI's website for current and future project and meeting announcements. We thank you for your patience as we carry out work towards this important project.
