Licence No.: 2200

Licence Issued: June 18, 1996

In accordance with the Manitoba Environment Act (C.C.S.M. c. E125)

THIS LICENCE IS ISSUED TO:

ADM AGRI-INDUSTRIES LTD. - CARBERRY; "the Licencee"

for the construction and operation of the Development being an oilseed/canola elevator and a four track railway loading and distribution system to be located on the SE 1/4 30-10-14 WPM in the Town of Carberry and the Rural Municipality of North Cypress, and in accordance with the Proposal filed under The Environment Act on April 19, 1996, and subject to the following specifications, limits, terms and conditions:

DEFINITIONS

In this Licence.

"A-weighted sound level" means the sound level measured in dBA units with a sound level meter set on the A-weighting network, being a filter designed to approximate the relative so one of an analytic and human ear to different frequencies of sound;

"ambient concentration" means the measurement of a substance contained in an air sample (corrected to a temperature of 25 degrees Celsius and to a pressure of 101.3 kilopa tals) in ich aas been collected from any point beyond the property line of the Development;

"appreciable impulsive or impact character" means sund which has a significant amount of impulsive or impact nature, such as hammering, explosions and clanking or beging. Inpulsive or impact sounds are sounds of short duration, usually less than one second, character accessly an a rupt cliset followed by a rapid decay;

"Director" means an employee so designated pursuant to the Environment Act;

"dB" (decibel) means a dimensionle measure required by sound pressure level, where,

sound level = $20 \log_{10}$ of {sound p. ser. (actu.!)}/{sound pressure (reference)};

"4 minute period(s) in the aggregate" any 16 readings, not necessarily contiguous, taken at 15 second intervals within a 1 hour amplity period;

"Leq (energy equivalent t lev" mans the A-weighted sound level (as decibels {dBA}) of a constant or steady sound, for a stand period, which has an amount of acoustic energy equivalent to that contained in the sound being measured:

"Leg(1)" means the eq for a one hour period;

"**opacity**" means the degree to which emissions reduce the transmission of light and obscure the view of an object in the background;

"particulate matter" means any finely divided liquid or solid matter other than water droplets;

"particulate residue" means that part or portion of an atmospheric emission which is deposited onto a surface;

"**point source**" means any point of emission from a Development where pollutants are ducted into the atmosphere;

"predominant discrete tone" means sound (for example a whine or hum) having a one-third octave band sound level

which, when measured in a one-third octave band, exceeds the arithmetic average of the sound levels of the two adjacent one-third octave bands on either side of such one-third octave band by:

- i. 5 dB for such one-third octave band with a center frequency from 500 Hertz to 20,000 Hertz, inclusive, provided such one-third octave band sound level exceeds the sound level of each adjacent one-third octave band;
- ii. 8 dB for such one-third octave band with a center frequency from 160 Hertz to 400 Hertz, inclusive, provided such one-third octave band sound level exceeds the sound level of each adjacent one-third octave band; or
- iii. 15 dB for such one-third octave band with a center frequency from 25 Hertz to 125 Hertz, inclusive, provided such one-third octave band sound level exceeds the sound level of each adjacent one-third octave band;

"sewage" means human body, toilet, liquid, waterborne culinary, sink or laundry waste.

GENERAL TERMS AND CONDITIONS

This Section of the Licence contains requirements intended to provide guidance to Licencee implementing practices to ensure that the environment is maintained in such a manner as to igh que ty of life, including social and economic development, recreation and leisure for preat and future

- 1. The Licencee shall, at all times during the operation of the Development, e that a high standard of equipment maintenance and operational practices are implemented
- 2. The Licencee shall reduce the production and dissemination of vastes by in ating and maintaining waste reduction and waste recycling programs.
- 3. The Licencee shall not emit particulate matter from the Develo n that: nent
 - i) particulate matter:
 - a. exceeds 0.23 grams per dry standard cubic metre alculated at 25 degrees Celsius and 760 millimetres of mercury, corrected to 12 percent carbon dio. de for rocesses involving combustion from any point source of the Development;
 - acity of greate than 5 percent at any point beyond the property line of b. exhibits a visible plume with an the Development; or
 - c. results in the deposition of visible articulate esidue at any time beyond the property line of the Development; or
 - ii) opacity from any point source of the Development equals or exceeds: a. 20 percent as the average of my 24 consecutive opacity observation
 - any 24 consecutive opacity observations taken at 15 second intervals;
 - b. 20 percent for me than 16 individual opacity observations within any 1 hour period; or
 - c. 40 percent for any individuality observation.
- 4. The Licencee shall a op, and ovide for the approval of the Director, a program to mitigate against any increased re t lev arising from increased traffic to and from the development.
- temit sound from any part or process of the Development, such that any emission when 5. The Lic point of reception within an area which is zoned as residential, exceeds the following {Leq(1)} measured limits:
 - i) subject to sub Clause 5 (ii):
 - a. 60 dBA during the daytime hours of 7:00 a.m. to 10:00 p.m., local time; or
 - b. 50 dBA during the nighttime hours of 10:00 p.m. to 7:00 a.m., local time; or
 - ii) when the sound has an appreciable impulsive or impact character or a predominant discrete tone:
 - a. 55 dBA during the daytime hours of 7:00 a.m. to 10:00 p.m., local time; or
 - b. 45 dBA during the nighttime hours of 10:00 p.m. to 7:00 a.m., local time.
- 6. The Licencee shall not emit sound from any part or process of the Development, such that any emission when measured at a point of reception within an area which is zoned as commercial, exceeds the following {Leq(1)} limits:
 - i. 70 dBA during the daytime hours of 7:00 a.m. to 10:00 p.m., local time; or

- ii. 60 dBA during the nighttime hours of 10:00 p.m. to 7:00 a.m., local time.
- 7. The Licencee shall not emit sound from any part or process of the Development, such that any emission when measured at a point of reception, beyond the property line of the Development and within an area which is zoned as industrial, exceeds an Leq(1) of 70 dBA at any time.
- 8. The Licencee, at the request of the Director, shall conduct soil, air (stack and/or ambient), ground water, surface water or noise monitoring at or adjacent to the Development.
- 9. The Licencee shall have each soil, air, or water sample collected pursuant to Clause 8, of this Licence, analyzed by a laboratory approved by the Director and using methods approved by the Director for any of the following analytes as may be specified by the Director:
 - i. Plant residues; and
 - ii. Particulate Matter (in air).
- 10. The Licencee shall submit a copy of the sampling report complete with analysical results as specified pursuant to Clauses 8 and 9, to the Director within 60 days of the completion of the sampling program.

II - REMEDIAL ACTION

11. The Licencee, subject to obtaining approval from an Environme. Officer shall mediately dispose of any contaminated material in accordance with the approval.

III - EMERGENCY CON VIGA CY ZAN

12. The Licencee shall submit, within ninety (90) days the line of this Licence, an emergency response contingency plan to be approved by the Director This lan shall metude, but not be limited to, items which will address: measures implemented for security; personnel the sing; fire and other response arrangements.

I - SITE DEC MMISSIONING

- 13. The Licencee shall submit within one (year prior o closure of the facility, for the approval of the Director, a formal detailed Decommission within the facility.
- 14. The Licencee shall implement on or our of the facility, the approved Decommissioning Plan.

EVIEW AND REVOCATION

- A. If, in the opinion of the Prector, the Licencee has exceeded or is exceeding or has or is failing to meet the specifications limits, and, or anditions set out in this Licence, the Director may, temporarily or permanently, revoke this Licence.
- B. If construction is the elopment is not commenced within three years of the date of this Licence, the Licence is revoked.
- C. If, in the opinion of the Director, new evidence warrants a change in the specifications, limits, terms, or conditions of this Licence, the Director may require the filing of a new proposal pursuant to Section 11 of The Environment Act.
