Licence No. / Licence n° ________ 2751 ________

Issue Date / Date de délivrance ________ January 11, 2007 ________

In accordance with The Environment Act (C.C.S.M. c. E125) /
Conformément à la Loi sur l'environnement (C.P.L.M. c. E125)

Pursuant to Section 11(1) / Conformément au Paragraphe 11(1)

THIS LICENCE IS ISSUED TO: / CETTE LICENCE EST DONNÉE À:

AGASSIZ RESOURCE MANAGEMENT LTD.;
"the Licencee"

for the construction and operation of the Development being an irrigation system in the
Rural Municipality of Dufferin (Winding Trail Farms and Robt McIntosh Ltd. Irrigation
Project), in accordance with the Proposal filed under The Environment Act dated
September 1, 2004, and additional information dated January 27, 2005, and subject to the
following specifications, limits, terms and conditions:

GENERAL TERMS AND CONDITIONS

This Section of the Licence contains requirements intended to provide guidance to
the Licencee in implementing practices to ensure that the environment is maintained in
such a manner as to sustain a high quality of life, including social and economic
development, recreation and leisure for present and future Manitobans.

1. The Licencee shall collect and dispose of all used oil products and other regulated
hazardous wastes generated by the machinery used in the construction and
operation of the Development in accordance with applicable Manitoba
Conservation and legislation requirements.

**A COPY OF THE LICENCE MUST BE KEPT ON SITE AT THE DEVELOPMENT
AT ALL TIMES**
2. The Licencee shall revegetate areas disturbed by the construction of the Development with a mixture of native or introduced grasses or legumes. These areas shall be revegetated as quickly as possible following construction to prevent soil erosion and the establishment of noxious weeds. Native species shall be used to revegetate areas where native species existed prior to construction.

3. The Licencee shall:
   a) prepare "As Constructed" drawings for the Development and shall label the drawings "As Constructed"; and
   b) provide to the Director, within three months of the completion of construction of the Development, two sets of "As Constructed" drawings.

SPECIFICATIONS, LIMITS, TERMS AND CONDITIONS

Project Scope

4. The Licencee shall, unless otherwise approved by the Director in writing, construct the water diversion and management works and irrigate the lands as described on Figure 1, attached to this Licence. The following fields or portions of fields are excluded from the project unless specifically approved by the Director in writing:
   (a) Robt McIntosh Field 12 in NW 6-6-5W – Portions with Land Suitability for Irrigated Potato Production rated as Class 5; and
   (b) Robt McIntosh Field 13 in NE 6-6-5W – Portions with Land Suitability for Irrigated Potato Production rated as Class 5.

Proposed amendments to this project must be submitted to the Director for approval with an accompanying discussion of the nature and purpose of the amendments.

Construction

5. The Licencee shall, not less than two weeks prior to beginning construction of the Development, provide notification to the Environment Officer responsible for the administration of this Licence of the intended starting date of construction and the name of the contractor responsible for the construction.

6. The Licencee shall establish any fuel storage areas required for the construction and operation of the Development:
   (a) a minimum distance of 100 metres from any waterbody; and
   (b) in compliance with the requirements of Manitoba Regulation 188/2001, or any future amendment thereof, respecting Storage and Handling of Petroleum Products and Allied Products.
7. The Licencee shall, during construction and operation of the Development,
   (a) immediately report any reportable spills to Manitoba Conservation’s
       Accident Reporting Line at (204) 944-4888; and
   (b) provide a follow-up report to the Director on a reportable environmental
       accident outlining the cause(s) and proposing corrective action to prevent
       reoccurrence.

8. The Licencee shall, during construction of the Development, take all appropriate
   measures to prevent erosion and the deposition of sediment into the Boyne River.

9. The Licencee shall not undertake instream construction activities in connection with
   the Development between April 1 and June 30 of any year.

10. The Licencee shall not undertake instream construction activities in connection with
    the Development during periods of high streamflow.

11. The Licencee shall, during construction of water intake works in connection with
    the Development, minimize the extent of clearing of riparian vegetation adjacent to
    the Boyne River.

12. The Licencee shall install buried pipelines on cultivated land or land in its natural
    state in accordance with the methodology illustrated in Figures 2 to 4, attached to
    this Licence. These procedures do not apply when a plough or a continuous
    trencher is used to install a pipeline.

**Operation – Matters Respecting Water Management and Water Quality Protection**

13. The Licencee shall install and maintain instream water diversion works associated
    with the Development in accordance with the requirements of the Department of
    Fisheries and Oceans and the Canadian Coast Guard.

14. The Licencee shall screen the pump intake associated with the Development in
    accordance with the Department of Fisheries and Oceans publication "Freshwater
    Intake End-of-Pipe Fish Screen Guideline" (March, 1995). Final screen design
    shall be approved by the Department of Fisheries and Oceans prior to the operation
    of the Development.

15. The Licencee shall maintain a minimum instream flow below the diversion point of
    the Development in SW 20-6-5W at all times while water is being diverted into the
    Development. The minimum instream flow at the diversion point shall be as
    determined by Manitoba Water Stewardship and specified in a Water Rights
    Licence issued for the Development.
16. The Licencee shall immediately cease diverting water from the Boyne River or reduce the diversion rate if the minimum instream flow provided for in Clause 15 of this Licence is not equalled or exceeded.

17. The Licencee shall limit the pumping rate at the water diversion point of the Development in SW 20-6-5W to 130 litres per second.

18. The Licencee shall, on a daily basis while irrigation is occurring from the Development, record volumes of water pumped, and durations of pumping. A report on this information shall be provided, by March 1 of the following year, to the Environment Officer responsible for the administration of this Licence, the Environmental Assessment and Licensing Branch, and the Water Licensing Branch of Manitoba Water Stewardship. The report shall be provided in the format shown in Table 1, attached to this Licence.

19. The Licencee shall install backflow prevention devices and maintain them in operational condition at all times if fertilizer or crop protection products are applied through the irrigation systems of the Development.

20. The Licencee shall, if fertilizer or crop protection products are applied through the irrigation systems of the Development, not allow irrigation water containing these materials to be applied to or drain to surface water bodies.

**Operation – Matters Respecting Land Management and Soil Quality Protection**

21. The Licencee shall not, with water diverted by the Development, irrigate any land parcel other than a land parcel described in Clause 4 of this Licence and identified in Figure 1 attached to this Licence. The area of potatoes irrigated in any year by the Development shall not exceed approximately 360 hectares (105 ha for Winding Trail Farms and 255 ha for Robt McIntosh Ltd.). Deviations from this limit by more than 10% shall not occur without the previous written authorization of the Director. In particular, the use of water diverted by the Development to irrigate land in the project area more frequently than one year in three with lesser amounts of water shall not occur.

22. The Licencee shall implement agronomic practices described in the following documents:

   (a) “Agronomic Assessment for the Larsen Irrigation Development Project”, prepared by AXYS Agronomics, 2003;

   (b) “Agronomic Assessment for the McIntosh Irrigation Development Project”, prepared by AXYS Agronomics, 2003; and

23. The Licencee shall, on Robt McIntosh Field 11 in SW 4-6-6W, maintain permanent grass cover on areas of the field with Land Suitability for Irrigated Potato Production rated as Class 5.

**Monitoring**

24. The Licencee shall, within three months of the date of this Licence, provide a report for the approval of the Director proposing a water quality monitoring plan for surface water and groundwater. The plan shall describe monitoring locations, monitoring frequencies, water quality parameters to be monitored, and reporting frequencies.

25. The Licencee shall implement the monitoring program approved pursuant to Clause 24 of this Licence. Reports on the monitoring program shall be provided on the schedule approved by the Director to the Red River Region and Environmental Assessment and Licensing Branch of Manitoba Conservation, and the Water Licensing Branch of Manitoba Water Stewardship.

26. The Licencee shall, upon the request of the Director:
   a) sample, monitor, analyze or investigate specific areas of concern regarding groundwater, surface water and soil for such duration and at such frequencies as may be specified;
   b) determine the environmental impact associated with the specific areas of concern; and
   c) provide the Director, within such time as may be specified, with such reports, drawings, specifications, analytical data, descriptions of sampling and analytical procedures being used, and such other information as may from time to time be requested.

27. The Licencee shall, prior to the commencement of operation of the Development, meet with the Environment Officer responsible for the administration of this Licence and the contact person for the Environmental Assessment and Licensing Branch of Manitoba Conservation to review the monitoring and reporting requirements of this Licence.

**REVIEW AND REVOCATION**

A. If, in the opinion of the Director, the Licencee has exceeded or is exceeding or has or is failing to meet the specifications, limits, terms, or conditions set out in this Licence, the Director may, temporarily or permanently, revoke this Licence.
B. If construction of the development has not commenced within three years of the date of this Licence, the Licence is revoked.

C. If, in the opinion of the Director, new evidence warrants a change in the specifications, limits, terms or conditions of this Licence, the Director may require the filing of a new proposal pursuant to Section 11 of The Environment Act.
