LOI SUR L'ENVIRONNEMENT

MANITOBA

THE ENVIRONMENT ACT
LOI SUR L'ENVIRONNEMENT

Licence No. / Licence n° 2759
Issue Date / Date de délivrance March 20, 2007

In accordance with The Environment Act (C.C.S.M. c. E125) /
Conformément à la Loi sur l'environnement (C.P.L.M. c. E125)

Pursuant to Section 11(1) / Conformément au Paragraphe 11(1)

THIS LICENCE IS ISSUED TO : / CETTE LICENCE EST DONNÉE À :

GREENWING ENERGY DEVELOPMENT L.P.; "the Licencee"

for the construction, operation and maintenance of the Development known as the Reston Wind Energy Project being a 99-megawatt commercial wind-powered electricity generation facility and ancillary facilities located on privately owned land within the Rural Municipalities of Pipestone and Albert between the communities of Pipestone and Reston. The Development involves the installation of between 40 and 70 wind-turbine generators, access roads, an underground electrical collector system, a collector substation and an operations and maintenance building, in accordance with the Proposal and Environmental Assessment Report filed under The Environment Act, dated December 5, 2006, and subject to the following specifications, limits, terms and conditions:

DEFINITIONS

In this Licence:

"Director" means an employee of the department appointed as such by the Minister;

"Environment Officer" means an employee of the department appointed as such by the Minister;

"noise" means unwanted or undesirable sound;

"noise nuisance" means a continuous or repeated noise in an affected area, which is offensive, obnoxious, troublesome, annoying, unpleasant or disagreeable to a person:
   a) residing in an affected area;
   b) working in an affected area; or

A COPY OF THIS LICENCE AND THE RESTON WIND ENERGY PROJECT ENVIRONMENTAL PROTECTION PLAN MUST BE KEPT ON SITE AT THE DEVELOPMENT AT ALL TIMES.

c) present at a location in an affected area which is normally open to the members of
the public;
if the noise:
d) is the subject of at least 5 written complaints, received by the Director in a form
satisfactory to the Director, and within a 90 day period, from 5 different persons
falling within clauses a), b) or c), who do not live in the same household; and

e) is the subject of at least one written compliant, received by the Director in a form
satisfactory to the Director, from a person falling within clauses a), b) or c), and the
Director is of the opinion that if the unwanted noise had occurred in a more densely
populated area there would have been at least 5 written complaints received within
a 90 day period from 5 different persons who do not live in the same household;

"leks" means bird dancing and display ground;

"point of reception" is any point on the premises of a person where sound originating
from other than those premises is received;

"wetland or wetlands" means those areas where the water table is at or above the land
surface for a long enough period each year to make the area capable of supporting aquatic
or hydrophilic vegetation, and which have soils with characteristics indicative of wet
conditions; and

"WTG" means wind turbine generator.

GENERAL TERMS AND CONDITIONS

This Section of the Licence contains requirements intended to provide guidance to
the Licencee in implementing practices to ensure that the environment is maintained in
such a manner as to sustain a high quality of life, including social and economic
development, recreation and leisure for present and future Manitobans.

1. The Licencee shall site wind turbine generators throughout the Development in
consideration of with the Provincial Guidelines for Sound Pollution,
Environmental Sound Objectives, Schedule A and any local by-law respecting
the siting of wind turbine generators.

2. The Licencee shall locate fuel storage and equipment servicing areas established
for the construction and operation of the Development a minimum distance of 100
meters from any waterbody, and operate the fuel storage areas in compliance with
the requirements of Manitoba Regulation 188/2001 respecting Storage and
Handling of Petroleum Products and Allied Products.
3. The Licencee shall, at all times during the construction of the Development, have materials available at the construction sites to contain and recover spills of fuel and other fluids associated with construction machinery.

4. The Licencee shall dispose non-reusable demolition and construction debris from the Development at a waste disposal ground operating under the authority of a permit pursuant to the Waste Disposal Ground Regulation, MR 150/91, or a Licence pursuant to The Environment Act.

5. The Licencee shall, during construction, dispose of all sewage and septage from on-site sanitary facilities in accordance with the Onsite Wastewater Management Systems Regulation, MR 83/2003.

6. The Licencee shall during construction and operation of the Development:
   a) immediately report any reportable spills to Manitoba Conservation’s Accident Reporting Line at (204) 944-4888, and
   b) at the request of the Director, provide a follow-up report to the Director on a reportable environmental accident outlining the cause(s) and propose corrective action to prevent reoccurrence.

7. The Licencee shall, during construction, adhere to the general recommendations on design, construction and maintenance of stream crossings as specified in the Manitoba Department of Conservation guidelines titled Manitoba Stream Crossing Guidelines for the Protection of Fish and Fish Habitat, 1996.

8. The Licencee shall, on a daily basis throughout construction and restoration of the Development, monitor the work activity to ensure that all the environmental practices outlined in the Environmental Assessment Report and Environmental Protection Plan are carried out.

9. The Licencee shall:
   a) prepare “As Constructed” drawings for the Development which show the location of the wind turbine generators and associated infrastructure in relation to topographical features within the project area; and
   b) provide to the Director, within six months of the completion of construction of the Development, two sets of “As Constructed” drawings.

SPECIFICATIONS, LIMITS, TERMS AND CONDITIONS

Respecting Pre-Construction

10. The Licencee shall, prior to construction, provide a copy of this Licence to the contractor and subcontractor(s) involved in the Development.
11. The Licencee shall not locate wind turbine generator structures near Class 3-5 wetlands closer than 200 meters from the riparian or functional edge of the wetland. Any setbacks in excess of 200 meters for specific wetlands shall be determined in consultation with the Wildlife and Ecosystem Protection Branch.

12. The Licencee shall, prior to the selection of wind turbine generator (WTG) locations, consult with the Petroleum Branch, the oil industry and the Surface Rights Board to ensure that any impacts from the Development on the oil industry are minimized. WTGs shall not be located closer than 120 meters from petroleum wells.

13. The Licencee shall avoid locating wind turbine generator structures:
   a) on lands containing economically valuable mineral deposits that are designated within a Municipal Development Plan, and
   b) on lands containing a valid quarry mineral lease that is in good standing under The Mines and Minerals Act.

14. The Licencee shall, following confirmation of location data for the project infrastructure and prior to the commencement of construction activities related to the Development, develop a Reston Wind Energy Project Environmental Protection Plan (EPP) in consultation with the Manitoba Conservation Wildlife and Ecosystem Protection Branch. A copy of the completed EPP shall be filed with the Director. The EPP shall describe the integrated approach to be used by the Licencee to undertake pre-construction plant and wildlife surveys and monitor the effects of construction activities and related environmental conditions both during construction and operation to ensure that mitigative measures are applied systematically and in a manner consistent with the commitments made in the Reston Wind Energy Project Environmental Assessment Report, December, 2006. Specifically, the Plan shall also describe:
   a) methods to be used to undertake a baseline study of bird use and bird habitat including leks affected by the Development;
   b) methods used to identify and survey any areas where rare plants may be present and affected by the Development;
   c) protocols and criteria to be used to implement a two year migratory bird and bat mortality study to monitor bird and bat mortality from strikes WTG structures;
   d) the methods and criteria to be used to evaluate birds and bird habitat during operation of the development;
   e) the proposed environmental management practices to be implemented to mitigate adverse effects to wildlife caused by the Development; and
   f) the proposed environmental management practices to be implemented to mitigate adverse effects on groundwater and local wells in the event of contamination during construction and operation.
15. The Licencee shall, prior to construction start-up, retain a qualified on-site field biologist to conduct a pre-construction survey within the project area to ensure that impacts to wildlife and vegetation are avoided or minimized during construction. The presence of rare and endangered species or species at risk within the Development area shall be reported immediately to the Biodiversity Conservation Section of the Manitoba Conservation Wildlife and Ecosystem Protection Branch in order to reach an agreement on impact mitigation measures for these species.

16. The Licencee shall, prior to construction, consult with Water Stewardship Regional Fisheries staff, the Department of Fisheries and Oceans and the field biologist to determine:
   a) site specific impact management practices, and
   b) water crossing locations and types.

17. The Licencee shall, prior to construction, obtain a Water Rights Act Licence for any dewatering required during construction.

**Respecting Construction**

18. The Licencee shall, during construction, avoid clearing, compacting, grading or filling any agricultural lands, yard sites and natural habitat areas including wetlands, woodlands and grasslands which are not required for the Development. All construction related traffic shall be restricted to the access roads and marshalling yards throughout the Development.

19. The Licencee shall construct underground electrical and communication cables across flowing waterways and through wetlands by augering, tunnelling or boring. Open cut crossings on flowing waterways and through wetlands shall not be made unless prior consultation with Manitoba Water Stewardship and Department of Fisheries and Oceans staff has occurred and the prior written approval of the Director has been obtained. Dry or non-flowing natural and artificial waterways may be crossed with open cut techniques where approval has been obtained from the provincial or municipal authority responsible for the channel.

20. The Licencee shall, during construction activities near waterbodies and wetland areas throughout the Development:
   a) locate any temporary marshalling yards and storage sites required for the Development a minimum distance of 200 meters from any wetland or watercourse;
   b) avoid construction activities on native grasslands, wetlands, lake or pond edges between April 15 and July 30;
   c) avoid instream construction between April 1 and June 15;
   d) avoid crossing first and second order drains by trenching until July 31st;
e) avoid burying underground electrical cables in or near wetlands;
f) avoid altering surface drainage patterns and wetland water levels;
g) maintain adequate setback distance between transmission line structures and wetlands; and
h) use metal poles in wetland areas where transmission line poles are required.

21. The Licencee shall, during construction, undertake temporary erosion control measures to reduce siltation from erosion prone areas. Erosion prone areas shall be monitored following construction to ensure stabilization procedures are effective.

22. The Licencee shall separate and replace topsoil from backhoe and trenching operations in accordance with the methodology described in Figures 1, 2 and 3 attached to this Licence. This requirement shall not apply where the topsoil has been previously disturbed due to the construction of roads or drains.

23. The Licencee shall obtain water required for dust control during construction from a source other than waste water treatment facilities.

24. The Licencee shall, at the completion of the construction of the Development:
   a) landscape and vegetate erosion prone areas disturbed during the construction with native plant species and cultivars, and
   b) fill and seal any boreholes and test pits to prevent groundwater contamination.

Respecting Operation

25. The Licencee shall maintain a buffer near wetlands and waterbodies of 30 meters for application of herbicides. Any herbicide application shall be carried out in accordance with applicable regulatory requirements.

26. The Licencee shall not cause or permit a noise nuisance to be created as a result of the operation of the Development, and shall take such steps as the Director may require to eliminate or mitigate noise nuisance.

27. The Licencee shall carry out any noise monitoring required by an Environment Officer at the point of reception.

28. The Licencee shall, in accordance with Clause 14 (c) of this Licence, file a copy of the two year post construction migratory bird and bat mortality study report with the Director.
Respecting Alterations to the Development

29. The Licencee shall obtain approval from the Director for any proposed alteration to the Development before proceeding with the alteration.

REVIEW AND REVOCATION

A. If, in the opinion of the Director, the Licencee has exceeded or is exceeding or has or is failing to meet the specifications, limits, terms, or conditions set out in this Licence, the Director may, temporarily or permanently, revoke this Licence.

B. If, in the opinion of the Director, new evidence warrants a change in the specifications, limits, terms or conditions of this Licence, the Director may require the filing of a new proposal pursuant to Section 11 of The Environment Act.

C. If the construction of the Development has not commenced within three years of the date of this Licence, the Licence is revoked.
