In accordance with the Manitoba Environment Act (C.C.S.M. c.E125)

THIS LICENCE IS ISSUED TO:

2936501 MANITOBA LTD.
CARRYING ON BUSINESS AS FOAMPAK; “the Licencee”

for the construction and operation of the Development being a manufacturing and industrial plant to produce expanded polyethylene foam packaging material, at 1901-C Logan Avenue in the City of Winnipeg, subject to the following specifications, limits, terms and conditions:

DEFINITIONS

In this Licence,

“A-weighted sound level” means the sound level measured in dBA units with a sound level meter set on the A-weighting network, being a filter designed to approximate the relative sensitivity of the normal human ear to different frequencies of sound;

“appreciable impulsive or impact character” means sound which has a significant amount of impulsive or impact nature, such as hammering, explosions and clanking or banging. Impulsive or impact sounds are sounds of short duration, usually less than one second, characterized by an abrupt onset followed by a rapid decay;

“ambient concentration” means the measurement of a substance contained in an air sample (corrected to a temperature of 25 °C and to a pressure of 101.3 kilopascals) which has been collected from any point beyond the property line of the operation;

“dB” (decibel) means a dimensionless measure of sound level or sound pressure level, where,

\[ \text{sound level} = 20 \log_{10} \frac{\text{sound pressure (actual)}}{\text{sound pressure (reference)}} \];

“4 minute period(s) in the aggregate” means any 16 readings, not necessarily contiguous, taken at 15 second intervals within a 1 hour sampling period;
"Leq (energy equivalent level)" means the A-weighted sound level (as decibels (dBA)) of a constant or steady sound, for a stated period, which has an amount of acoustic energy equivalent to that contained in the sound being measured;

"Leq(1)" means the Leq for a one hour period;

"opacity" means the degree to which emissions reduce the transmission of light and obscure the view of an object in the background;

"particulate matter" means any finely divided liquid or solid matter other than water droplets;

"particulate residue" means that part or portion of an atmospheric emission which is deposited onto a surface;

"point source" means any point of emission from the Development where pollutants are ducted into the atmosphere;

"predominant discrete tone" means sound (for example a whine or hum) having a one-third octave band sound level which, when measured in a one-third octave band, exceeds the arithmetic average of the sound levels of the two adjacent one-third octave bands on either side of such one-third octave band by:

i) 5 dB for such one-third octave band with a center frequency from 500 Hertz to 20,000 Hertz, inclusive, provided such one-third octave band sound level exceeds the sound level of each adjacent one-third octave band;

ii) 8 dB for such one-third octave band with a center frequency from 160 Hertz to 400 Hertz, inclusive, provided such one-third octave band sound level exceeds the sound level of each adjacent one-third octave band; or

iii) 15 dB for such one-third octave band with a center frequency from 25 Hertz to 125 Hertz, inclusive, provided such one-third octave band sound level exceeds the sound level of each adjacent one-third octave band;

"sewage" means human body, toilet, liquid, waterborne culinary, sink or laundry waste;

"VOC" (Volatile Organic Compound) means any chemical compound containing the element carbon, excluding methane, carbon monoxide, carbon dioxide, carbonic acid, metallic carbides and carbonates, ammonium carbonate, and other compounds which may be exempt by the Director.

**GENERAL SPECIFICATIONS**

1. The Licencee shall ensure that a high standard of equipment maintenance and good housekeeping and operational practices are carried out with respect to the Development, at all times.

2. The Licencee shall reduce the production and dissemination of wastes by initiating and maintaining waste reduction and waste recycling programs.
3. The Licencee shall not emit particulate matter from the Development such that:
   i) particulate matter:
      a) exceeds 0.23 grams per dry standard cubic metre calculated at 25 degrees Celsius and 760 millimetres of mercury, corrected to 12 percent carbon dioxide for processes involving combustion, from any point source of the Development;
      b) exhibits a visible plume with an opacity of greater than 5 percent at any point beyond the property line of the Development; or
      c) results in the deposition of visible particulate residue at any time beyond the property line of the Development;
   OR,
   ii) opacity from any point source of the Development equals or exceeds:
      a) 20 percent for a 4 minute period(s) in the aggregate in any one hour; or
      b) 40 percent at any time.

4. The Licencee shall not emit odour from any part or process of the Development such that any emission is detectable when measured by a method approved by the Director and at a point of reception:
   i) within an area which is zoned residential or commercial when one volume of odorous air is diluted with one equal volume of odour-free air; or
   ii) within an area which is zoned industrial when one volume of odorous air is diluted with six equal volumes of odour-free air.

5. The Licencee shall not emit sound from any part or process of the Development, such that any emission when measured at a point of reception within an area which is zoned residential, exceeds the following (L_{eq})(1) limits:
   i) subject to sub-Clause 5 (ii):
      a) 60 dBA during the daytime hours of 7:00 a.m. to 10:00 p.m., local time; or
      b) 50 dBA during the nighttime hours of 10:00 p.m. to 7:00 a.m., local time;
   OR,
   ii) when the sound has an appreciable impulsive or impact character or a predominant discrete tone:
      a) 55 dBA during the daytime hours of 7:00 a.m. to 10:00 p.m., local time; or
      b) 45 dBA during the nighttime hours of 10:00 p.m. to 7:00 a.m., local time.
6. The Licencee shall not emit sound from any part or process of the Development, such that any emission when measured at a point of reception within an area which is zoned commercial, exceeds the following \( L_{eq}(1) \) limits:
   i) 70 dBA during the daytime hours of 7:00 a.m. to 10:00 p.m., local time; or
   ii) 60 dBA during the nighttime hours of 10:00 p.m. to 7:00 a.m., local time.

7. The Licencee shall not emit sound from any part or process of the Development, such that any emission when measured at a point of reception, beyond the property line of the Development and within an area which is zoned industrial, exceeds an \( L_{eq}(1) \) of 70 dBA at any time.

8. The Licencee shall provide, at the request of the Director, a sampling station(s) at designated point source stacks. The station(s) shall provide proper access, personnel safety features, power supply and other features as may be specified by the Director.

9. The Licencee shall, when requested by the Director, conduct a sampling program and analyze air emissions at the Development for total VOC's. Samples are to be collected using methods approved by the Director, and analysis is to be performed in a manner approved by the Director.

10. The Licencee shall submit a copy of the sampling report complete with analytical results as specified pursuant to Clause 9, to the Director within 60 days of the completion of the sampling program.

11. The Licencee shall submit, on a semi-annual basis (calendar year), a written report to the Director containing the following information for all gases used as a physical blowing agent at the Development:
   i) identification of agent;
   ii) amount acquired in the report period;
   iii) total amount acquired in the calendar year.

II - LIQUID EMISSIONS

12. The Licencee shall not direct any spillage, contaminated run-off or pollutant, other than sewage, to a sewage disposal system.

III - EMERGENCY CONTINGENCY PLAN

13. The Licencee shall submit, within ninety (90) days of the issuance of this Licence, an emergency response contingency plan to be approved by the Director. This plan must include, but is not limited to, items which will address: measures implemented for accidental releases of butane; security; personnel training; fire and other response arrangements.
REVOCAION

If in the opinion of the Director the Licencee has exceeded or is exceeding the specifications, limits, terms or conditions set out herein, the Director may revoke, temporarily or permanently, this Licence.
