Dear Susan Lambert:

**Re: Dry Weather Overflow Event – March 16 – March 25 2022
Portage Avenue Interceptor Siphon Replacement Project at Omand's Creek**

Environment, Climate and Parks acknowledges receipt of the Dry Weather Overflow Notification Reports nos. 4 to 11, 13 and 14, along with the analytical results for the samples collected during the Overflow event received May 6, 2022.

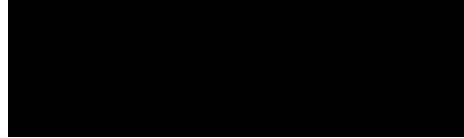

The above reports provided a summary of the activities and discharge volumes from each day of the discharge event. As this event occurred during a planned construction project, the Portage Avenue Interceptor Siphon Replacement Project, and was of significant volume and duration, the department is requiring a final closure report be submitted on the incident.

The report must include technical issues that lead to discharge event, an overview of what occurred during the event, circumstances which impacted the severity and duration of the event, Finally, the report should provide an assessment of what steps can and will be taken to prevent such an event from occurring on similar projects in future.

This report must be submitted to the Environmental Compliance and Enforcement branch by July 15, 2022.

If you have any questions on this matter, please contact Julie Froese, Environment Officer, Environmental Compliance and Enforcement Branch at Julie.Froese@gov.mb.ca or 204-945-7104.

Sincerely,

Kristal Harman
Director
Environmental Compliance and
Enforcement
