

AN ORDER OF THE CLEAN ENVIRONMENT COMMISSION
UNDER THE CLEAN ENVIRONMENT ACT

RE: THE CLEAN ENVIRONMENT COMMISSION and INLAND CEMENT INDUSTRIES LIMITED,
Applicant,

WHEREAS pursuant to the provisions of the Clean Environment Act, Inland Cement Industries Limited submitted an application to the Department of Mines, Resources and Environmental Management in connection with the operation of a cement manufacturing plant located at Lots 1 - 11 in the Parish of St. Charles in the City of Winnipeg;

AND WHEREAS in the absence of limits being prescribed by a Regulation under the said Act, the said application was referred to The Clean Environment Commission for the prescribing of limits;

AND WHEREAS no representation was made to the said Commission by any person who is or who is likely to be affected by an Order of the Commission prescribing limits in connection with the said operation;

AND WHEREAS the said Commission considered the application on the 8th and 29th days of August, 1977;

IT IS HEREBY ORDERED THAT

1. The Applicant shall ensure that on and after the 1st day of July, 1978, the amount of particulate matter emitted into the ambient air from the said operation, measured in pounds of particulate matter per ton* of clinker produced or consumed does not exceed:
 - (a) 1.6 for kiln sources,
 - (b) 0.6 for clinker cooler sources,
 - (c) 0.1 for grinding, bagging and bulk loading sources.

2. The Applicant shall ensure that on and after the 1st day of July, 1978, dust emissions from vehicle traffic and/or wind entrainment, do not exhibit an opacity greater than 5% at any point beyond the property line of the said operation.

Rescinded

- 3. The Applicant shall ensure that on or before the 1st day of October, 1978, the kiln sources and the clinker cooler sources are tested in accordance with Appendix "A" of this Order to demonstrate compliance with Clause 1 of this Order.
- 4. The Applicant shall ensure that further testing is carried out in accordance with Appendix "A" of this Order upon written request from the Environmental Management Division of the Department of Mines, Resources and Environmental Management, within 21 days of such a request.
- 5. The Applicant shall ensure that a high standard of maintenance and housekeeping are carried out consistent with meeting the limits prescribed in this Order.

Order No. 745

Dated at the City of Winnipeg

this 6th day of September, 1977.

 Chairman,
 The Clean Environment Commission.

* "ton" means a quantity weighing 2000 pounds.

rescinded

APPENDIX "A" TO ORDER NO. 746

Testing of the kiln sources and clinker cooling sources shall be carried out in accordance with the testing code "Standard Reference Methods of Source Testing: Measurement of Emissions of Particulates from Stationary Sources - EPS 1-AP-74-1" or an alternative method approved, in writing, by the Environmental Management Division of the Department of Mines, Resources and Environmental Management. Each emission test shall consist of at least three valid test runs of a minimum unbroken duration of 120 minutes each. All emission tests shall be carried out under normal plant operating conditions and shall be observed by an inspector designated by the Environmental Management Division of the Department of Mines, Resources and Environmental Management. A copy of the test results shall be forwarded to the inspector within 21 days of the completion of testing.

rescinded
