## **ENVIRONMENTAL MONITORING**

In accordance with Clause 25 of the Environment Act Licence (No. 2856 RRRR), the following is an annual report of site operations as required by Manitoba Sustainable Development. This report includes details of the annual monitoring occurring at the Industrial Metals property. The following sections describe the results of the noise testing, air quality testing, soil testing, groundwater testing and ASR testing.

### **SECTION 1**

#### **Noise Monitoring**

In the Standard Operating Procedures and Monitoring Program, four sites around the perimeter of the property were chosen as representative locations for noise leaving the property. Noise levels in decibels were recorded using a digital sound level meter at each location on the property several times during the day, in a sampling event. The average noise level for each location was recorded. Sampling events were taken monthly (beginning in May, 2016) and always during operating hours. Results of the noise level monitoring during 2016 are summarized in the table below:

Month (2016)	Units	Sampling Location			
		North	West	South	East
May	dBA	78.1	70	81	91
June	dBA	70.2	70.8	73.6	86.4
July	dBA	71.4	75.6	74.1	84.6
August	dBA	71	73.8	76	84.9
September	dBA	73.9	72.8	75	85
October	dBA	69.4	71.4	72.8	84.6
November	dBA	73.4	70.4	71.4	82.4
December	dBA	72.1	73.4	68.6	82.3
<b>Yearly Average</b>	<b>dBA</b>	<b>72.4</b>	<b>72.3</b>	<b>74.1</b>	<b>85.2</b>

Sampling locations corresponded with the location plan attached to the Standard Operating Procedures and Monitoring Plan. No noise complaints for the site were received in 2016.

## Noise Reduction Program

The following steps have been taken to reduce noise levels on the property:

- Suppliers are continually informed of acceptable materials to be received onsite, such as those without combustible fuels and hazardous materials, which reduce the potential for explosions and other noise impacts
- All incoming loads are inspected for potentially explosive materials and those materials not accepted are sent back with the suppliers
- The mechanical equipment onsite (i.e. material transport vehicles, material sorting equipment and the shredder) are maintained regularly
- Explosive noises from the shredder operation are reduced by containing within the hammermill
- New methods for reducing noise impacts and explosion prevention technologies are continually explored through supplier meetings and conferences attended by Industrial Metals staff.

## Shredder Explosions

The following table is a summary of explosion events occurring at the shredder in 2016:

Date	Time	Description and Cause of Explosion	Outcome or Action Taken	Intensity * 1 - 10
22/2/16	9:41 am	Midsize explosion in the shredder with a small visible fire. Cause unknown	The shredder operation continued. The flame was extinguished in seconds. No need for fire suppression or emergency services	5
29/2/16	11:10 am	Small explosion in the hammermill. Cause unknown	-	3
25/5/16	10:30 am	Small explosion visible from a car	-	3
28/9/16	11:00 am	Small visible fire. May have been a small amount of fuel trapped in a fuel line. Nothing unusual being fed into shredder at the time of the incident	-	3

\* Intensity Scale: 1 – audible with no visible fire;  
5 – audible with fire contained in the hammermill;  
10 – audible with fire visible outside the hammermill

## SECTION 2

### Air Quality and Monitoring

Air quality is maintained at acceptable levels in the site buildings and around the perimeter of the property, in accordance with the Manitoba Ambient Air Quality Criteria and to the Environment Act Licence (No. 2856 RRRR). Air quality monitoring helps to determine if levels of air borne particulates exceed published levels, and if a potential threat to human and environmental health and safety exists.

Dust emissions are minimized from the onsite operations, in accordance with the Environment Act Licence requirements, which include:

- the use of skirts on all drop chutes of the shredder
- the use of covered bins for ASR collection.

In addition, water is used to suppress dust from dry ground conditions onsite, if it become a nuisance to surrounding properties.

Baseline air quality sampling will include:

- one sampling event over a 24 hour period to be conducted while the site is not in operation
- one sampling event over a 24 hour period to be conducted while the site is in operation
- three sample locations over the site as indicated on the attached plan
- utilizing appropriate pump and filters for the following parameters:
  - Total Suspended Particulate
  - Total Metals
  - Mercury
  - Chromium
- Submitting samples to a laboratory for analysis.

Wind direction and speed will also be recorded throughout the sampling period, along with other weather conditions which may impact results. If possible, measurements should be taken on days with minimal wind and precipitation.

WINNIPEG, MANITOBA  
R2J 0G5

PH (204) 233-1908 FAX (204) 233-1933

---

Due to the timing of the approval of the site sampling program and limitations of equipment during the winter season, air quality samples were not obtained in 2016, but will be conducted in 2017.

## SECTION 3

### Soil Quality Monitoring

Baseline soil quality sampling was conducted on January 11, 2017, and included:

- Sampling from 3 separate locations as identified in the Standard Operating and Maintenance Program
  - Site 1 was located in the north portion of the property, near the ASR processing building. The site was used for storage of scrap metal materials
  - Site 2 was located west of the shredder. The site was used for storage of scrap metal materials
  - Site 3 was located in the southwest corner of the site next to the perimeter fence. The site was for storage of a metals collection bin
- One set of shallow samples from each location obtained at a depth of approximately 0.3 m below the surface
- Submitting samples to laboratory for analysis of the parameters in the table below.

Deeper samples from each location were not able to be obtained due to the frost depth and the limitations of equipment onsite. Testing of deeper soil samples will occur after the ground has thawed in the spring/summer of 2017.

Results of the laboratory analysis are summarized in the table below:

Parameter Measured	Units	Site 1	Site 2	Site 3
		0.3 m depth	0.3 m depth	0.3 m depth
Benzene (VOC)	mg/kg	0.0584	0.195	0.169
Ethylbenzene (VOC)	mg/kg	0.056	0.055	0.054
Toluene (VOC)	mg/kg	0.072	0.10	0.181
Xylene (VOC)	mg/kg	0.22	0.117	0.142
Naphthalene (PAH)	mg/kg	0.106	0.298	0.131
Benzo(a)pyrene (PAH)	mg/kg	0.871	0.481	0.492
Polychlorinated Biphenyl (PCB)	mg/kg	<1.5	<3.0	<1.5
Arsenic	mg/kg	19.3	13.5	9.04
Cadmium	mg/kg	5.03	7.65	2.99
Chromium	mg/kg	188	171	53
Copper	mg/kg	985	644	183
Iron	mg/kg	97300	75500	47700
Lead	mg/kg	684	856	328

## SECTION 4

### Groundwater Quality Monitoring

Baseline groundwater quality sampling was conducted on January 11, 2017, and included:

- a sample collected from the non-potable water tap, located in the shredder building (this water originates from an existing deep aquifer well on site)
- submitting samples to laboratory for analysis of the parameters in the table below.

Results of the laboratory analysis were compared with federal and provincial water quality guidelines for drinking water and are summarized in the table below:

Parameter Measured	Units	Groundwater	Drinking Water Guidelines	
			MAC	AO
Benzene (VOC)	mg/L	<0.0005	0.005	
Ethylbenzene (VOC)	mg/L	<0.0005	0.14	≤0.0016
Toluene (VOC)	mg/L	<0.0005	0.06	≤0.024
Xylene (VOC)	mg/L	<0.0005	0.09	≤0.02
Naphthalene (PAH)	mg/L	<0.00005	NG	
Benzo(a)pyrene (PAH)	mg/L	<0.000005	0.00001	
Polychlorinated Biphenyl (PCB)	mg/L	<0.0015	NG	
Arsenic	mg/L	0.00164	0.010	
Cadmium	mg/L	<0.00001	0.005	
Chromium	mg/L	<0.001	0.05	
Copper	mg/L	0.00639		≤1.0
Iron	mg/L	0.334		≤0.3
Lead	mg/L	0.000513	0.01	
Magnesium	mg/L	75.6	NG	
Mercury	mg/L	0.000005	0.001	
Nickel	mg/L	<0.002	NG	
Tin	mg/L	<0.0002	NG	
Uranium	mg/L	0.0019	0.02	
Zinc	mg/L	0.0337		≤5.0

**Notes for Table**

MAC - Maximum Acceptable Concentration

AO - Aesthetic Objective

NG - No Guideline Criteria Established

Bolded and highlighted values indicate values exceeding the Canadian Drinking Water Guideline limits

Guidelines for Canadian Drinking Water Quality, Health Canada, 2012, and Tier III Water Quality Objectives, Manitoba Water Stewardship, 2011.

# CCME F2-F4 HYDROCARBON DISTRIBUTION REPORT

ALS Sample ID: L1878348-1  
Client Sample ID: SITE 1 - SHALLOW

The CCME F2-F4 Hydrocarbon Distribution Report (HDR) is intended to assist you in characterizing hydrocarbon products that may be present in your sample.

The scale at the bottom of the chromatogram indicates the approximate retention times of common petroleum products and four n-alkane hydrocarbon marker compounds. Retention times may vary between samples, but general patterns and distributions will remain similar.

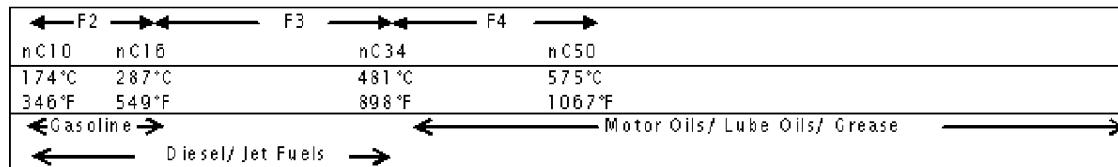

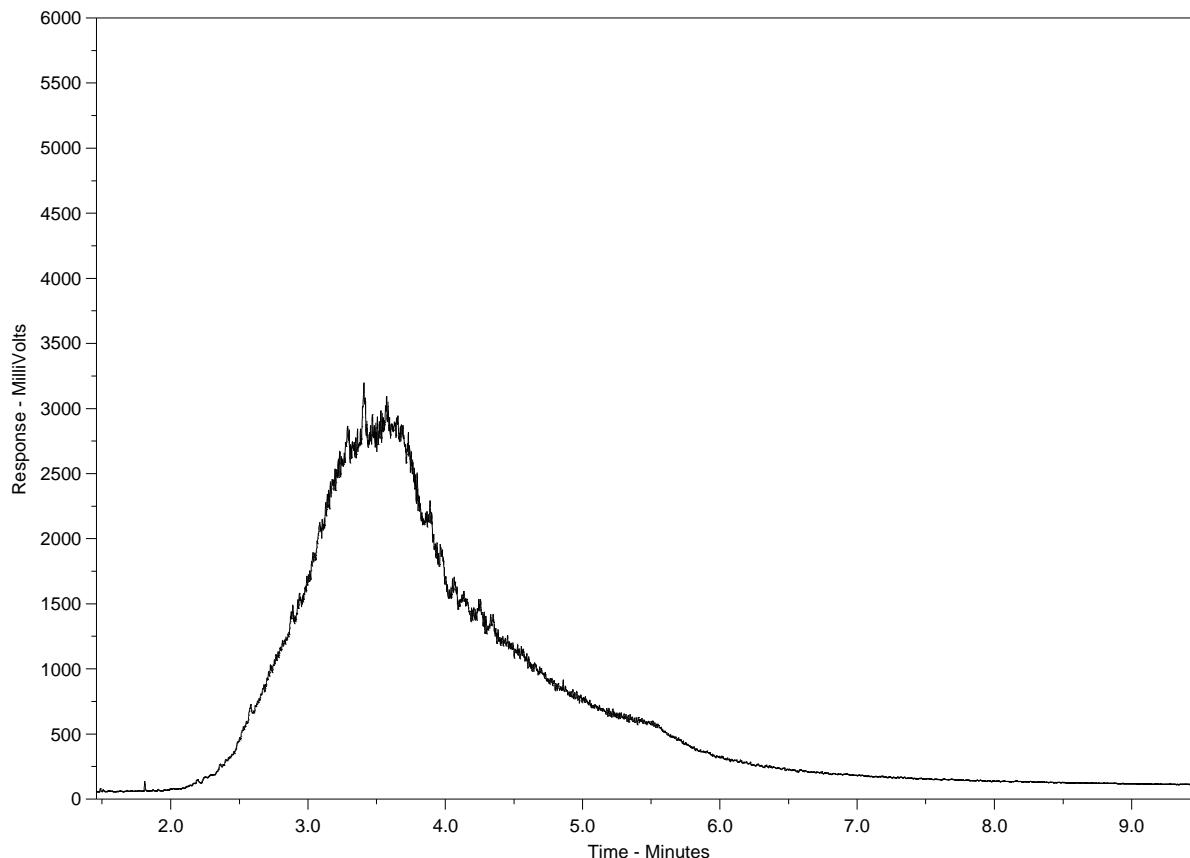

Peak heights in this report are a function of the sample concentration, the sample amount extracted, the sample dilution factor, and the scale at left.

Note: This chromatogram was produced using GC conditions that are specific to ALS Canada CCME F2-F4 method. Refer to the ALS Canada CCME F2-F4 Hydrocarbon Library for a collection of chromatograms from common reference samples (fuels, oils, etc.). The HDR library can be found at [www.alsglobal.com](http://www.alsglobal.com).

# CCME F2-F4 HYDROCARBON DISTRIBUTION REPORT

ALS Sample ID: L1878348-3  
Client Sample ID: SITE 2 - SHALLOW

The CCME F2-F4 Hydrocarbon Distribution Report (HDR) is intended to assist you in characterizing hydrocarbon products that may be present in your sample.

The scale at the bottom of the chromatogram indicates the approximate retention times of common petroleum products and four n-alkane hydrocarbon marker compounds. Retention times may vary between samples, but general patterns and distributions will remain similar.

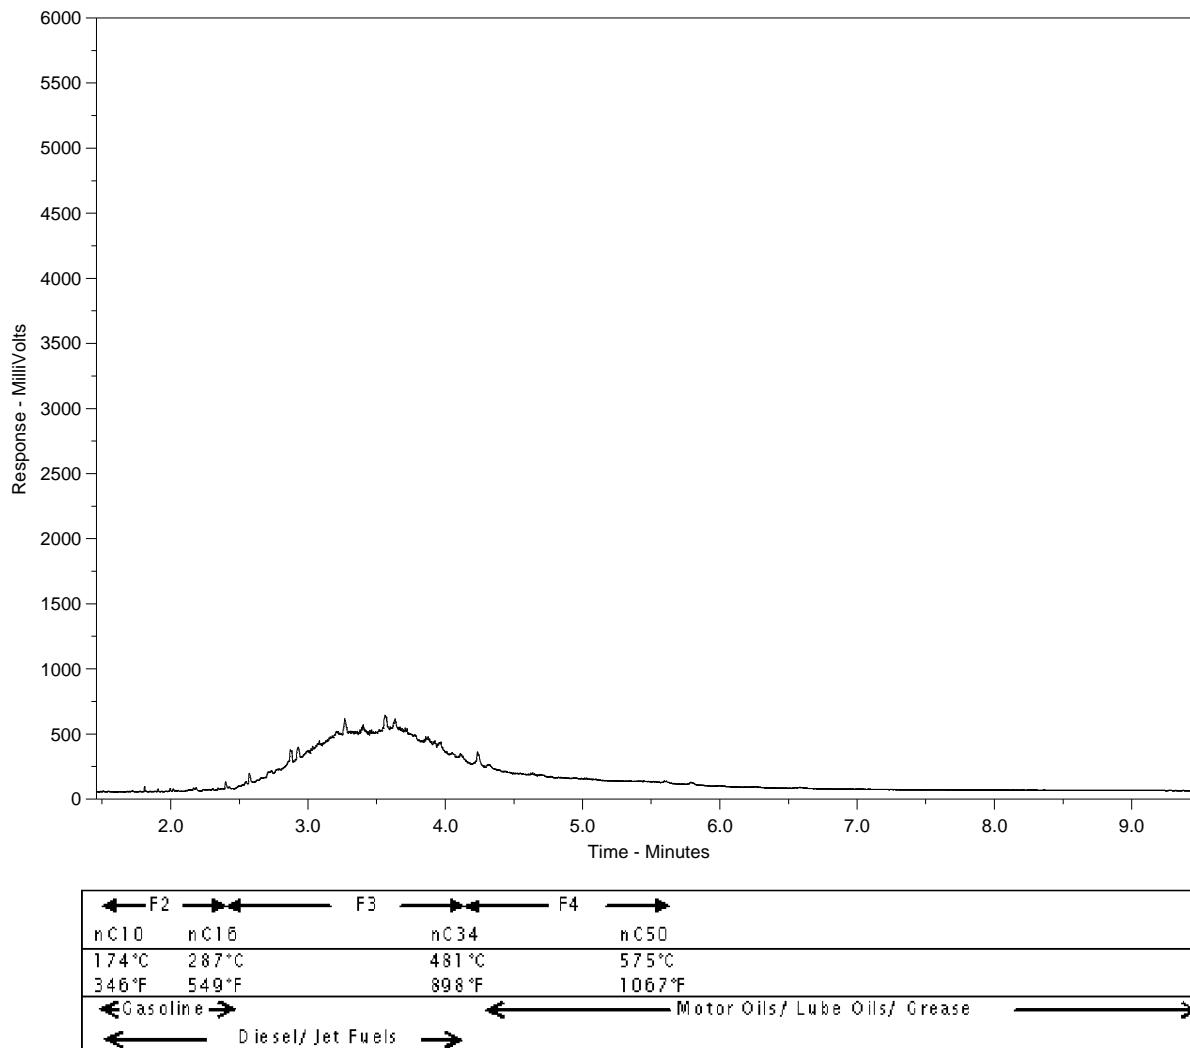

Peak heights in this report are a function of the sample concentration, the sample amount extracted, the sample dilution factor, and the scale at left.

# CCME F2-F4 HYDROCARBON DISTRIBUTION REPORT

ALS Sample ID: L1878348-7  
Client Sample ID: GW1

The CCME F2-F4 Hydrocarbon Distribution Report (HDR) is intended to assist you in characterizing hydrocarbon products that may be present in your sample.

The scale at the bottom of the chromatogram indicates the approximate retention times of common petroleum products and four n-alkane hydrocarbon marker compounds. Retention times may vary between samples, but general patterns and distributions will remain similar.

Peak heights in this report are a function of the sample concentration, the sample amount extracted, the sample dilution factor, and the scale at left.

Note: This chromatogram was produced using GC conditions that are specific to ALS Canada CCME F2-F4 method. Refer to the ALS Canada CCME F2-F4 Hydrocarbon Library for a collection of chromatograms from common reference samples (fuels, oils, etc.). The HDR library can be found at [www.alsglobal.com](http://www.alsglobal.com).

# CCME F2-F4 HYDROCARBON DISTRIBUTION REPORT

ALS Sample ID: L1842884-1  
Client Sample ID: INDUSTRIAL METALS

F2 → ← F3 → ← F4 →			
nC10	nC16	nC34	nC50
174°C	287°C	481°C	575°C
346°F	549°F	898°F	1067°F
Gasoline →	← Motor Oils/Lube Oils/Grease →		
← Diesel/Jet Fuels →			

The CCME F2-F4 Hydrocarbon Distribution Report (HDR) is intended to assist you in characterizing hydrocarbon products that may be present in your sample.

The scale at the bottom of the chromatogram indicates the approximate retention times of common petroleum products and four n-alkane hydrocarbon marker compounds. Retention times may vary between samples, but general patterns and distributions will remain similar.

Peak heights in this report are a function of the sample concentration, the sample amount extracted, the sample dilution factor and the scale at the left.

Note: This chromatogram was produced using GC conditions that are specific to ALS Canada CCME F2-F4 method. Refer to the ALS Canada CCME F2-F4 Hydrocarbon Library for a collection of chromatograms from common reference samples (fuels, oils, etc.). The HDR Library can be found at [www.alsglobal.com](http://www.alsglobal.com).
