Rachel Penner  
Environmental Officer  
Environmental Approvals Branch  
Manitoba Environment and Climate Change  
14 Fultz Boulevard  
Winnipeg MB R3Y 0L

Dear Rachel Penner,

**RE: Inspection of Target Products Ltd. - 400 Pandora Av. West (Licence # 3024)**

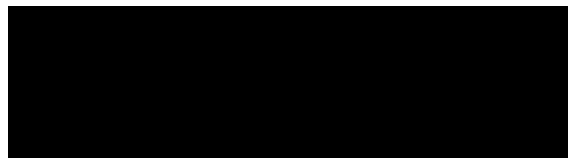

On November 6, 2024 we received a communication requesting submission of the outstanding **Notice of Alteration Form** required due to the addition of the FAAR Gold Series Dust Collector on our open-mouth-bag line.

Please find attached a copy of the Notice of Alteration Form and also a copy of the NoA report as provided in 2020. If you have any other need for information or have questions, please feel free to reach out to either:

## Detailed Report of Changes to Development – Target Products LTD.

400 Pandora Av. W, Winnipeg MB, R2C5K9

Client File # 5596.00

**EAL No.:3024**

As per company mandate to reduce dust in plant operations in all facilities and plants, a new dust collector was installed on our open mouth bagging line. The unit is a Gold Series X-Flo (GSX) industrial dust collector rated at 10hp with 4 standard filters and recovery of dust into a sealed 50gallon drum. Due to the wet nature of a majority of the aggregate products that we package on this line, minimal dust is generated. The purpose of this dust collector is to minimize potential silica inhalation for our employees when occasionally packaging dustier products on this line. All dust collected from this line will be recycled back into our aggregate stock. Environmental impact is also minimal due to the fact that this line is only utilized during the 6 months of the year where freezing of aggregate in feed hoppers is not a problem. No changes have been made to increase production by this installation or increases to lengths of shifts. Please view following pictures of installed dust collector and piping:
