**Subject:** Opapiskaw Campground WTP File: 5893.00

Hello,

The initial review of the above Environment Act Proposal has been completed. No public comments were received on the project and two comments from the Technical Advisory Committee; one of which requires follow-up.

Sustainable Development has the following comments regarding Opapiskaw Campground File: 5893.00

### The Office of the Fire Commissioner (OFC)

The OFC recommends that:

- the applicant obtain the required building and occupancy permits from the AHJ for any additions and new buildings, and
- an Emergency Plan be filed and approved by the local Fire Department prior to Occupancy in accordance Section 2.8 of the Manitoba Fire Code.

Please note the comments are for information and follow-up, and no response is needed.

Thanks,

Re. Environment Act Proposal No. 5893  
Opapiskaw Campground – S ½ 13-14-13 EPM  
Unorganized Territory: Whiteshell Provincial Park  
(Manitoba Sustainable Development – Parks and Protected Spaces Branch – Owner)  
Due: July 11, 2017

We are in receipt of the above application for Environment Act Proposal No. 5893. The intent of this application is to allow for water treatment plant upgrades, the WTPs ongoing operation and to permit seasonal surface discharge of residuals. The existing facility is not operating under an Environment Act Licence. Proposed upgrades include: the installation of a new Lake intake; multimedia sand filtration; staged cartridge filtration; granular activated (GAC) contractor; ion exchanger; UV; Chlorination; a residuals sedimentation tank; and the re-use of the existing filter backwash line to Nutimik Lake. The proposed new treatment equipment is to be installed within the existing WTP building and old treatment equipment is to be removed.

The subject property is located in unorganized territory. As such development is regulated by *The Planning Act* including *Provincial Planning Regulation (81/2001)*. Applicable policies include:

- 4.3.3 The development of an outdoor recreation use must not detract from the natural and recreational character that it relies on, or exceed the carrying capacity of the resource.
- 5.1.3 To ensure the protection, retention and where required, rehabilitation of riparian area, the following setbacks must be applied in respect of development:
  - b) A minimum setback of 30 metres (100 feet) upslope from the normal high water mark for all natural water bodies and waterways, including ephemeral streams;  
The natural vegetative cover must be retained or rehabilitated within the above setbacks.
- 5.1.4 Developments that create minor disturbances to the natural vegetative cover in riparian areas, such as docks, pathways and boathouses, may be permitted in those areas provided that not more than 25% of the length of the lot's shoreline is affected.
- 5.1.6 To protect water that supplies a drinking water system, appropriate land use planning or suitable mitigation measures must be implemented to ensure that development does not:
  - a) Contribute pathogenic organisms, deleterious chemicals or nutrients to a drinking water source; or
  - b) Increase the turbidity of a drinking water source.
- 6.2.2 Planning and development decisions are to be coordinated with and reflect local wastewater management and drinking water service plans to ensure that:
  - a) Sustainable sources of drinking water are available;
  - b) Appropriate wastewater management and drinking water services are provided as needs or standards change; and

- c) Consideration is given to the capacity of the wastewater management and drinking water systems needed to accommodate new development.

Community and Regional Planning have no objection to the proposed Environment Act License as the Existing WTP building is located outside the 30 metre riparian setback; vegetation which was disturbed during the installation of the discharge and intake lines was minimal and disturbed areas have been returned to their natural state; upgrades to the WTP address new standards (current drinking water regulations); provide a sustainable source of drinking water; and consideration has been made for future water requirements. In addition, no long term adverse effects on the water quality in the Lake and River are anticipated.

Sincerely,

A handwritten signature in blue ink, appearing to read "Janis Dicks".

**To:** Garcia, Donna (SD)  
**Subject:** RE: Request for review/comment - Opapiskaw Campground WTP File: 5893.00

Hi Donna,

The Office of Drinking Water has reviewed the above-noted EAP and would like their licence to include a clause to notify known water users downstream on Nutimik Lake in case of a significant discharge of filter effluent that could affect other water intakes. The water users include Barrier Bay and the LGD of Pinawa, known surface water intake sites.
