**SUBJECT: Municipality of Norfolk Treherne – Road 54W Realignment
– File: 5934.00**

Environmental Compliance and Enforcement has reviewed the Environment Act Proposal identified as Municipality of Norfolk Treherne – Road 54W Realignment – File: 5934.00. The Environmental Compliance and Enforcement Branch recommends inclusion of terms and conditions that will facilitate procedures for compliance monitoring, and containment dangerous goods that may be stored at the construction site, and sediments.

1. An Environment Officer of the Portage la Prairie Office of the Environmental Compliance and Enforcement Branch should be notified at least two weeks prior to commencement of clearing and construction and provided the following information:
 - a) the name and contact information of the proponent's environmental supervisor assigned to the project,
 - b) the proposed schedule of activities,
 - c) emergency response plans acceptable to the director.
2. The storage sites for petroleum products, and other dangerous goods, should have minimum setback distances from waterbodies.
3. Materials and equipment should be available at the site to contain accidental releases of dangerous goods, and also to contain the transport of sediments to waterbodies.

SUBJECT: Environment Act proposal for review: Road 54W Realignment

HRB File Number: AAS-17-12661

Further to your request for review and comments on the Environment Act Proposal submitted by the Municipality of Norfolk Treherne for the proposed road 54W, the Historic Resources Branch has examined the location in conjunction with Branch records for areas of potential concern. The proposed area is located at the centre of a horseshoe in the Assiniboine River, an ancient and active riverine feature and historical watercourse route. Additionally, there is a documented archaeological site roughly 1Km north of the projects area, with additional sites in the surrounding area and upriver. These factors suggest that any excavation of ground materials within the proposed area, including the grading of the Assiniboine Riverbank, has the potential to impact heritage resources. Therefore, the Historic Resources Branch has concerns with the proposed work.

Under Section 12(2) of The Heritage Resources Act, if the Minister of Sport, Culture and Heritage has reason to believe that heritage resources or human remains are known, or thought likely to be present, on lands that are to be developed, then the owner/developer is required to conduct at his/her own expense, a heritage resource impact assessment (HRIA) and mitigation, if necessary, prior to the project's start.

The developer must contract a qualified archaeological consultant to conduct a Heritage Resources Impact Assessment (HRIA) prior to development, in order to identify and assess any heritage resources that may be unearthed during future road realignment efforts and riverbank stabilization. If desirable, the Branch will work with the developer/land owners and its consultant to draw up terms of reference for this project.

If you have any questions or comments, please feel free to contact the Branch as above.
