

SUMMARY OF COMMENTS/RECOMMENDATIONS

PROPONENT: Rockwell Collins Inc.
PROPOSAL NAME: B/E Aerospace facility
CLASS OF DEVELOPMENT: 2
TYPE OF DEVELOPMENT: Manufacturing -
CLIENT FILE NO.: 5981.00

OVERVIEW:

Manitoba Sustainable Development received a Proposal on August 20, 2018 for the continued operation of an aerospace parts manufacturing facility at 25 Dunlop Avenue (SP Lot 3 Plan 26529 WLTO in OTM Lots 1 and 2 of Parish of Kildonan and in NE ¼ 24-11-2 EPM) in Winnipeg, Manitoba. The facility manufactures and modifies various airplane parts from sheet aluminum and aluminum billets and conducts flammability tests for various aircraft materials including upholstery, plastic, and leather.

The Department, on September 21, 2018, placed copies of the Proposal in the Public Registry located at Legislative Library (200 Vaughan Street) and online at <https://www.gov.mb.ca/sd/eal/registries/5981beaerospace/index.html>. Copies of the Proposal were also provided to the Technical Advisory Committee (TAC) members. A notice of the Environment Act proposal was also placed in the Winnipeg Free Press on September 22, 2018. The newspaper and TAC notifications invited responses until October 24, 2018.

COMMENTS FROM THE PUBLIC:

No Comment

SUMMARY of COMMENTS from the TECHNICAL ADVISORY COMMITTEE:

No	Technical Advisory Committee Member	Response Provided
1	Canadian Environmental Assessment Agency	No Comments
2	Manitoba Agriculture – Land Use Branch	No Response

COMMENTS FROM THE TECHNICAL ADVISORY COMMITTEE:

Manitoba Sustainable Development –Environmental Compliance and Enforcement Branch

Environmental Compliance and Enforcement Branch has provided the following comments:

1. Does EnconDrum evaporator have any pollution control device in addition to the reusable filter screen? Is the filter screen capable to capture toxic vapors? If not is it necessary to have an appropriate pollution control device to capture any toxic vapors?
2. Is there any roof top stack for the exhaust of process emission?
3. The spent filters from the paint booth should be disposed of as hazardous waste.

Disposition:

The proponent provided additional information indicating that the EnconDrum evaporator has been decommissioned and all spent paint booth filters will be picked by a licensed hazardous waste collector. The Environmental Compliance and Enforcement Branch reviewed the response and has no further comment. In addition clauses 25, 27 and 28 of the draft Environment Act Licence address concerns related to hazardous waste disposal and wastewater issues.

Manitoba Growth, Enterprise and Trade – Office of Fire Commissioner

The following OFC recommendations have been forwarded to the proponent:

1. To comply with The Manitoba Fire Code
2. To submit a Fire Safety Plan and obtain required permit from the City of Winnipeg.

PUBLIC HEARING:

There is no public comment received, therefore, a public hearing is not recommended.

CROWN-INDIGENOUS CONSULTATION:

The Government of Manitoba recognizes that it has a duty to consult in a meaningful way with Indigenous communities when any proposed provincial law, regulation, decision or action may infringe upon or adversely affect the exercise of the Indigenous rights of that community.

This proposed operation is an existing facility located within the City of Winnipeg. There would be no infringement of Indigenous rights under Section 35 of the Constitution Act, 1982 at this time. Therefore, it is concluded that Crown-Indigenous consultation is not required for the project.

RECOMMENDATION:

The Proponent should be issued a Licence for the continued operation of an aerospace parts manufacturing facility in accordance with the specifications, terms and conditions of the attached

draft Licence. Enforcement of the Licence should be assigned to the Environmental Compliance and Enforcement Branch of Manitoba Sustainable Development.
