SUBJECT: Comments on Environment Act Proposal for Rockwell Collins Inc.'s B/E Aerospace Manufacturing Facility (File No. 5981.00)

Environmental Compliance and Enforcement Branch (Winnipeg Regional Office) of Manitoba Sustainable Development reviewed the above noted Environmental Act Proposal for the operation of a manufacturing facility of aerospace parts at 25 Dunlop Avenue in Winnipeg and has the following comments to provide:

1. It is mentioned that EnconDrum evaporator is vented to the atmosphere. Is there is any pollution control device in addition to the reusable filter screen is employed? Is there is any roof top stack involve for the exhaust emission process?
2. Is the reusable filter screen of the EnconDrum evaporator is capable to capture toxic vapors before they are exhausted to the atmosphere? If not is it necessary to have an appropriate pollution control device as an interceptor to prevent or reduce any toxic vapors escaping to the atmosphere, as many chemicals with toxic nature are sent to the evaporator.
3. It is mentioned that spent filters from the paint booth are disposed of to the municipal landfill. Should that be disposed of as hazardous waste?

Hi Eshetu;

The OFC recommends that the proponent to:

- Comply with the Manitoba Fire Code, and
- Submit Fire Safety Plan and obtain required permits from the Authority Having Jurisdiction (City of Winnipeg).
