RE: Vivian Sand Facility Project – Environment Act Proposal (EAP) Application

Dear Ms. Winsor,

On behalf of CanWhite Sands Corp. ('CanWhite'), enclosed is an Environment Act Proposal (EAP) application including an EAP report for the Vivian Sand Facility Project (the 'Project'). As outlined in the EAP report, the Project will consist of a silica sand processing facility and associated infrastructure located south of the hamlet of Vivian, Manitoba and approximately 35 km east of the City of Winnipeg within the R.M. of Springfield. The processing facility will have an estimated annual production rate of approximately 1,360,000 tonnes of silica sand at full operation that will be processed on-site (washed and dried) prior to being directly loaded into railcars for shipping to markets in Canada, the United States and internationally. The anticipated life of the Project will be 24 years.

If you have any questions regarding the proposed Project, please contact me at your earliest convenience.

Yours sincerely,

Marlene Gifford
