Dear Ms. Winsor,

This letter is to notify you that CanWhite Sands will be proceeding with land clearing on private land owned by CanWhite beginning on Friday, April 9, 2021. CanWhite is not commencing construction of the Processing Facility or any supporting infrastructure, and continues to wait for the issuance of an Environment Act License prior to beginning construction or any further such activities.

CanWhite will be moving forward with this clearing in order to avoid the peak breeding bird season for this 'Zone B4' area: April 25 – August 15, during which all clearing is prohibited. CanWhite must proceed with clearing the land prior April 25<sup>th</sup> to avoid a full one-year delay of construction and operations.

A Facility Site Clearing Strategy document, as per the request by the Technical Advisory Committee, has been generated and communicated to the Wildlife and Fisheries Branch. This Site Clearing Strategy outlines the policies, procedures and mitigation measures that will be implemented throughout clearing activities to minimize impact to the local environmental.

Please let us know if you have any questions.

Regards,

  
Brent Bullen  
Chief Operating Officer  
CanWhite Sands Corp.
