Subject: Forest destroyed

Hello Sarah Guillemard

My name is Reed Favoni-Grossart, I am contacting you regarding to the Winnipeg perimeter expansion. I have seen the design plans for the perimeter, specifically at the intersection with St. Mary's road. According to the designs, this expansion will destroy the forest and small marsh beside the perimeter. This would mean many trees all destroyed and the home of deer, foxes and many, many other animals gone. I live in this area and I often walk by the forest and see deer near my house, I do not want that to stop and it should not. I understand the importance of having a perimeter with limited stop lights, but this should not be traded for the importance of our forests and animals.

Is there anything you or I can do to alter this expansion?

Let me know your thoughts and if there are any plans of action I should take

Thanks

Reed
