Re: Dangerous Goods Handling and Transportation Act Licence No. 363 HW

Dear Marci Quane:

Thank you for your proposal. Enclosed Licence No. 363 HW (licence) is issued to the Rural Municipality of Oakview. The licence is for the operation of the Rapid City Waste Transfer Station Hazardous Waste Depot (facility).

The Rural Municipality of Oakview must operate the facility according to all licence requirements and applicable federal, provincial, and municipal regulations and by-laws.

The Rural Municipality of Oakview must submit a notice of alteration to secure approval from the director of the Environmental Approvals Branch before altering the facility.

Anyone affected by the issuance of this licence may appeal the decision to the Minister of Environment, Climate and Parks. Appeals may be submitted in writing to the Minister at minecp@leg.gov.mb.ca by August 26, 2022.

If you have any questions regarding this approval, please contact Kristy Forrestall, Regional Supervisor, Environmental Compliance and Enforcement Branch at EnvCEWestern@gov.mb.ca or 204-573-0518.

Sincerely,

Original signed by,

James Capotosto
Director

LICENCE

File No.: 6102.00

Licence No./Licence n°: 363 HW

Issue Date/Date de délivrance: July 27, 2022

In accordance with The Dangerous Goods Handling and Transportation Act
(C.C.S.M. c. D12) /
Conformément à la Loi sur la manutention et le transport des marchandises dangereuses
(C.P.L.M. c. D12)

THIS LICENCE IS ISSUED TO:/CETTE LICENCE EST DONNÉE À:

RURAL MUNICIPALITY OF OAKVIEW; "the licensee"

for the construction and operation of the facility being a hazardous waste collection, storage, and transfer depot, as identified in Schedule A of this licence, located at the Rapid City Waste Transfer Station on portions of SW 29-13-19 WPM within the Rural Municipality of Oakview, Manitoba in accordance with the application filed pursuant to The Dangerous Goods Handling and Transportation Act on March 17, 2021, and additional information dated May 2, 2022, and subject to the following specifications, limits, terms, and conditions:

DEFINITIONS

In this licence,

"**accredited laboratory**" means an analytical facility accredited by the Standards Council of Canada (SCC), or accredited by another accrediting agency recognized by Manitoba Environment, Climate and Parks to be equivalent to the SCC, or be able to demonstrate, upon request, that it has the quality assurance/quality control (QA/QC) procedures in place equivalent to accreditation based on the international standard ISO/IEC 17025, or otherwise approved by the director;

"**Act**" means The Dangerous Goods Handling and Transportation Act, C.C.S.M.c.D 12;

"**affected area**" means a geographical area, excluding the property of the facility;

"**approved**" means approved by the director or assigned environment officer in writing;

"**container**" means a container (e.g. drum or drum equivalent, tub skid, or any container with a capacity of less than 30 litres) used for holding hazardous wastes;

"**containment area**" means an area that is equipped or designed with an impermeable barrier that prevents leaks or spills from reaching outside the specified area;

"contaminant" means a contaminant as defined in The Dangerous Goods Handling and Transportation Act, or any future amendment thereof;

"dangerous goods" means any product, substance or organism designated in the regulations, or conforming with the criteria set out in the regulations, or in any regulation adopted in accordance with The Dangerous Goods Handling and Transportation Act, and includes hazardous wastes;

"days" means calendar days unless otherwise indicated;

"director" means an employee so designated pursuant to The Dangerous Goods Handling and Transportation Act;

"drum" means a container having a capacity of 205 litres;

"drum equivalent" means a volume of 205 litres;

"environment officer" means an employee so designated pursuant to The Dangerous Goods Handling and Transportation Act;

"hazardous waste" means a product, substance or organism as defined in The Dangerous Goods Handling and Transportation Act, or any future amendment thereof;

"licensed carrier" means a person who has a valid licence to transport hazardous waste pursuant to the Hazardous Waste Regulation under The Dangerous Goods Handling and Transportation Act, or any future amendment thereof;

"Manitoba Household Hazardous Waste Stewardship Program" means the program proposed by the Product Care Association and approved by the director which provides consumers in Manitoba with a collection system for specified household hazardous waste materials using the services of qualified recycling collection facilities;

"noise nuisance" means an unwanted sound, in an affected area, which is annoying, troublesome, or disagreeable to a person:

- a) residing in an affected area;
- b) working in an affected area; or
- c) present at a location in an affected area which is normally open to members of the public; if the unwanted sound
- d) is the subject of at least 5 written complaints, received by the director in a form satisfactory to the director and within a 90-day period, from 5 different persons falling within clauses a), b) or c), who do not live in the same household; or
- e) is the subject of at least one written complaint, received by the director in a form satisfactory to the director, from a person falling within clauses a), b) or c) and the director is of the opinion that if the unwanted sound had occurred in a more densely populated area there would have been at least 5 written complaints received within a 90-day period, from 5 different persons who do not live in the same household;

"odour nuisance" means a continuous or repeated odour, smell or aroma, in an affected area, which is offensive, obnoxious, troublesome, annoying, unpleasant or disagreeable to a person:

- a) residing in an affected area;

- b) working in an affected area; or
- c) present at a location in an affected area which is normally open to members of the public; if the odour, smell or aroma
- d) is the subject of at least 5 written complaints, received by the director in a form satisfactory to the director and within a 90-day period, from 5 different persons falling within clauses (a), (b) or (c), who do not live in the same household; or
- e) is the subject of at least one written complaint, received by the director in a form satisfactory to the director, from a person falling within clauses (a), (b) or (c) and the director is of the opinion that if the odour, smell or aroma had occurred in a more densely populated area there would have been at least 5 written complaints received within a 90-day period, from 5 different persons who do not live in the same household.

"operator" means a person who is responsible for the day-to-day maintenance and operation of the facility;

"permanently closed" means that the facility is not operated for a period of twelve (12) months or more;

"Product Care Manitoba Collection Site Guidelines" means the document "Manitoba Collection Site Guidelines – HHW Collection Sites" dated 2018, or any future amendment thereof by the Stewardship Program. This contains practical guidance and best management practices for collection site operators regarding staff handling and storing of program products collected under the Manitoba Household Hazardous Waste Stewardship program;

"QA/QC" means quality assurance/quality control;

"registered generator" means a person who is registered as a hazardous waste generator pursuant to the Hazardous Waste Regulation under The Dangerous Goods Handling and Transportation Act, or any future amendment thereof;

"Standard Methods for the Examination of Water and Wastewater" means the most recent edition of Standard Methods for the Examination of Water and Wastewater published jointly by the American Public Health Association, the American Water Works Association, and the Water Environment Federation;

"Transportation of Dangerous Goods Regulations" means the Transportation of Dangerous Goods Regulations, made under The Transportation of Dangerous Goods Act, 1992 (Canada), or any future amendment thereof;

"used oil" means petroleum-derived or synthetic lubrication oil that has become unsuitable for its original purpose due to the presence of physical or chemical impurities or the loss of original properties if the oil falls within any of the following categories:

- a) lubrication oils for internal combustion engines such as motor oil, vehicle crankcase oil, and engine lubricating oil;
- b) transmission fluids, gearbox, and differential oils; and
- c) hydraulic fluids;

"used oil filter" means an oil filter containing used oil that through use, storage, handling, defect, damage or other similar circumstances can no longer be used for its original purpose;

"used oil products and material" means used oil, used oil filters or used oil containers;

"waste automotive battery" means a lead-acid electromotive battery that:

- a) through use, storage, handling, defect, damage, expiry of shelf life or other similar circumstance can no longer be used for its original purpose; or
- b) for any other reason, the owner or person in possession of the battery intends to dispose of it;

"waste disposal ground" means an area of land designated by a person, municipality, provincial government agency, or crown corporation for the disposal of waste and approved for use in accordance with Manitoba Waste Management Facilities Regulation and any future amendments thereto, or a licence pursuant to The Environment Act; and

"wastewater" means any liquid containing a contaminant as defined in The Dangerous Goods Handling and Transportation Act, associated with or resulting from the facility and which requires treatment prior to being discharged into the environment.

GENERAL TERMS AND CONDITIONS

This section of the licence contains requirements intended to provide guidance to the licensee in implementing practices to ensure that the environment is maintained in such a manner as to sustain a high quality of life, including social and economic development, recreation and leisure for present and future Manitobans.

Retain Copy of Licence

1. The licensee shall at all times maintain a copy of this licence at the facility or at the premises from which the facility's operations are managed.

Reporting Format

2. The licensee shall submit all information required to be provided to the director or environment officer under this licence, in written and electronic format, in such form (including number of copies) and of such content as may be specified by the director or environment officer, and each submission shall be clearly labelled with the licence number and file number associated with this licence.

Respecting Maintenance

3. The licensee shall implement a high standard of equipment maintenance and good housekeeping and operational practices with respect to the facility, at all times.

Respecting Environmental Coordinator

4. The licensee shall designate an employee, within 60 days of the date of issuance of this licence, as the licensee's environmental coordinator, whose job description will include assisting the licensee in complying with the limits, terms, and conditions in this licence and assisting senior management of the licensee to manage environmental issues at the facility. The name of the environmental coordinator shall be submitted in writing to the director within 14 days of the appointment and any subsequent appointment.

General Terms

5. The licensee shall notify the director, in writing, of any intention or agreement to lease any part or portion of the facility's property, including buildings or structures, where such leasing might involve the establishment of any other development with a potential for emissions which may affect the environment.
6. The restrictions and conditions of this licence are severable. If any restriction or condition of this licence, or the application thereof, to any circumstances is held invalid, the application of such restriction or condition to other circumstances and the remainder of this licence shall not be affected thereby.
7. Nothing in this licence shall be construed to relieve the licensee from civil or criminal penalties.
8. The licensee shall at the request of the director:
 - a) conduct special studies to determine ambient air quality within the vicinity of the facility and/or emission testing for specified air pollutants in a manner satisfactory to the director; and
 - b) submit a report containing the ambient air quality data and/or the emission testing data and all other related data to the director within 90 days after completion of the studies.

Future Sampling

9. In addition to any terms or conditions specified in this licence, the licensee shall, upon the request of the director:
 - a) sample, monitor, analyze and/or investigate specific areas of concern regarding any segment, component or aspect of pollutant storage, containment, treatment, handling, disposal or emission systems, for such pollutants or ambient quality, aquatic toxicity, leachate characteristics and discharge or emission rates, for such duration and at such frequencies as may be specified;
 - b) determine the environmental impact associated with the release of any pollutant(s) from the facility;
 - c) conduct specific investigations in response to the data gathered during environmental monitoring programs; or
 - d) provide the director within such time as may be specified, with such reports, drawings, specifications, analytical data, descriptions of sampling and analytical procedures being used, bioassay data, flow rate measurements and such other information as may from time to time be requested.

Sampling Methods

10. The licensee shall, unless otherwise specified in this licence:
 - a) carry out all preservations and analyses on liquid samples in accordance with the methods prescribed in the most current edition of Standard Methods for the Examination of Water and Wastewater or in accordance with equivalent preservation and analytical methodologies approved by the director;
 - b) carry out all sampling of, and preservation and analyses on, dangerous goods, hazardous wastes, soil, compost or air samples in accordance with methodologies approved by the director;

- c) have all analytical determinations undertaken by an accredited laboratory; and
- d) report the results to the director, in writing and in an electronic form acceptable to the director within 60 days of the samples being taken, or within another time frame as specified by the director.

Remedial Measures

11. The licensee shall carry out, as deemed necessary by the director or environment officer, any remedial measures or modifications in respect to matters authorized under this licence.

Fire Reporting

12. The licensee shall in the event of a fire which continues in excess of 30 minutes or requires fire suppression assistance from personnel outside of the facility (example: fire department):
- a) call the fire department; and
 - b) report the fire by calling the Environmental Emergency Report Line at 204-944-4888 (toll free 1-855-944-4888), identifying the type of materials involved and the location of the fire.

Odour Nuisance

13. The licensee shall not cause or permit an odour nuisance to be created as a result of the construction, operation, or alteration of the facility, and shall take such steps as the director may specify to eliminate or mitigate an odour nuisance.

Noise Nuisance

14. The licensee shall not cause or permit a noise nuisance to be created as a result of the operation or alteration of the facility, and shall take such steps as the director may require to eliminate or mitigate a noise nuisance.

Trained Personnel

15. The licensee shall provide the following training for all persons who will be assigned duties at the facility:
- a) transportation of dangerous goods;
 - b) regulatory requirements; and
 - c) procedures pertaining to the operation of the facility including spill response.
16. The licensee shall make records of the training provided pursuant to clause 15 of this licence available for inspection by an environment officer upon request.
17. The licensee shall have trained personnel on-site at all times when the facility is open to receive waste or materials.

Facility Access

18. The licensee shall, when the trained personnel are not present at the facility, restrict access to the facility with a gate and lock to prevent unauthorized delivery of hazardous waste.

Signage

19. The licensee shall post legible, weatherproof signs at the entrance of the facility identifying the area as a hazardous waste collection facility, and the signs shall indicate the hours of operation, a contact number, and a warning not to leave hazardous waste at the facility when the trained personnel are not available to accept materials.

SPECIFICATIONS, LIMITS, TERMS, AND CONDITIONS

Facility Operations

20. The licensee shall not receive at the facility any hazardous waste other than the types of hazardous waste listed in Schedule B of this licence.
21. The licensee shall comply with all the applicable requirements of:
 - a) the Storage and Handling of Petroleum Products and Allied Products Regulation, or any future amendment thereof, respecting the Storage and Handling of Petroleum Products and Allied Products;
 - b) the Hazardous Waste Regulation, or any future amendment thereof, respecting hazardous waste;
 - c) Manitoba Office of the Fire Commissioner; and
 - d) Manitoba Fire Code, of any future amendment thereof.

Manitoba Household Hazardous Waste Stewardship Program Materials

22. The licensee shall receive and store household hazardous wastes that are identified as program materials and non-program materials under the Manitoba Household Hazardous Waste Stewardship Program in accordance with the most current version of the Manitoba Product Care Collection Site Guidelines and this licence.

Non-Program Hazardous Waste

23. The licensee shall segregate non-program hazardous wastes and dispose of them at a facility operating under the authority of a licence issued pursuant to The Dangerous Goods Handling and Transportation Act in Manitoba, or under an approval of similar type in another jurisdiction.

Hazardous Waste Storage

24. The licensee shall store hazardous waste in accordance with the requirements of the Manitoba Fire Code, or any future amendment thereof.
25. The licensee shall not store hazardous waste outside the storage structure or depot of the facility except:
 - a) when the Manitoba Fire Code prohibits inside storage;
 - b) when approved by an environment officer; or
 - c) for purposes of handling during receiving or shipping operations of not more than 48 hours, unless otherwise approved by an environment officer.

26. The licensee shall prominently affix a weather-resistant label with the name of the hazardous waste in the container.

Transport of Hazardous Waste

27. The licensee shall only use licensed carriers to transport hazardous waste from the facility.
28. The licensee shall accompany hazardous waste transported from the facility with a hazardous waste movement document.
29. The licensee shall transport all hazardous waste received at the facility within 90 days. The 90 day period will commence on the date the container is filled.
30. The licensee shall only allow transport of hazardous waste received at the facility to:
 - a) a hazardous waste disposal facility licensed in accordance with The Dangerous Goods Handling and Transportation Act;
 - b) a consignee who operates a used oil burner in accordance with the Hazardous Waste Regulation;
 - c) a consignee who operates a used oil collection facility in accordance with the Hazardous Waste Regulation;
 - d) a facility otherwise approved by the director pursuant to an Order; or
 - e) a facility operating under a licence or an approval of similar type in another jurisdiction.

Pesticide Container Depot

31. The licensee shall use the pesticide container depot to store containers which were last used to contain pesticide products.
32. The licensee shall locate the pesticide container depot on soil formations which will prevent percolation of contaminants into groundwater. The licensee shall, where local soils are not adequate to protect groundwater, construct containment in a manner approved by the director.
33. The licensee shall manage the pesticide container depot in order to prevent drainage or run-off from the area entering or leaving the container depot.
34. The licensee shall grade the area within the pesticide container depot to a sump capable of retaining any accumulated precipitation and/or pesticide residues.
35. The licensee shall surround the pesticide container depot with a fence capable of retaining all containers stored within the facility and separating the storage area from the surrounding land use.
36. The licensee shall maintain a fire break outside of the perimeter fence identified in clause 35 of this licence to prevent the spread of fire into the pesticide container depot.
37. The licensee shall designate separate areas within the pesticide container depot for the storage of metal and plastic containers.
38. The licensee shall remove the accumulated containers from the pesticide container depot at least once per year.

39. The licensee shall manage any liquid accumulated at the pesticide container depot in the sump in accordance with the requirements of the Hazardous Waste Regulation, or any future amendment thereof.

Used Oil Products and Material Collection Depot

40. The licensee shall store used oil in double wall storage tank(s).
41. The licensee shall locate the double wall tank used for the storage of used oil on an impervious surface which consists of at least 152 mm of compacted clay or on an impermeable containment area acceptable to the director.
42. The licensee shall use a storage tank with a capacity of 2,270 litres or less to collect used oil at the facility.
43. The licensee shall equip the used oil transfer area with a containment system that is capable of containing 110% of the volume of used oil being transferred.
44. The licensee shall, whenever used oil is being transferred to or from the tank of a vehicle, or to or from the storage tank, or via any other transfer systems, supervise the transfer at all times and in such a manner that the flow of liquid can be immediately shut off.
45. The licensee shall store used oil filters received at the facility in containers that have a maximum capacity of 205 liters and are designed so that they will contain any used oil which may drain from the filters.
46. The licensee shall store the containers for used oil filters referred to in clause 45 of this licence in a manner which provides protection from precipitation.
47. The licensee shall store used oil containers received at the facility in containers that are constructed of a material that will contain any used oil that may drain from the containers.

Waste Automotive Batteries

48. The licensee shall store the waste automotive batteries in an area where the floor or base is resistant to acid.
49. The licensee shall store the waste automotive batteries on pallets or in tub skids in the following manner:
 - a) if pallets are used, the waste automotive batteries shall be placed on the pallets with a layer of corrugated cardboard or other material which will prevent casing ruptures, placed between successive layers of waste automotive batteries. The full pallet of batteries shall have three layers of batteries and be shrink-wrapped with plastic before shipment from the facility; and
 - b) if tub skids are used, the waste automotive batteries shall be placed in acid-resistant, leak-proof tub skids.
50. The licensee shall conspicuously place in the area used for storage of waste automotive batteries effective neutralizing materials, or materials approved by the director in writing, for the containment or clean up of spills.

51. The licensee, shall in the event of a spill, dispose of the water used to clean up the spill in accordance with applicable regulations.
52. The licensee shall not allow the inventory of waste automotive batteries at the facility to exceed 200 at any one time.

Liquid Emissions

53. The licensee shall:
 - a) maintain the facility in a condition capable of retaining any spillage which may occur. Floor drains or catch basins are not permitted in the storage area unless they are connected to an on-site holding tank or sump; and
 - b) direct wastewater collected in holding tanks or sumps to a wastewater treatment facility approved by the director.

Spills

54. The licensee shall equip the facility with spill cleanup equipment and supplies.
55. The licensee shall in the event of an Environmental Accident as defined in The Dangerous Goods Handling and Transportation Act and Regulations thereunder, take all necessary actions to report the spill by calling the Environmental Emergency Report Line at (204) 944-4888 (toll free 1-855-944-4888) in accordance with regulatory requirements, contain the spill, manage the impacted environment, and restore the environment to the satisfaction of the director.

Solid Waste

56. The licensee shall dispose of all non-hazardous solid waste generated or collected at the facility, which is not recycled, only to a waste disposal ground.

Facility Inspection

57. The licensee shall inspect the facility every day that the facility is operating, and manage any unauthorized materials found at the facility by securely storing them or removing them from the facility.
58. The licensee shall record each inspection required by clause 57 of this licence and make the records available to an environment officer upon request. The record shall include the following:
 - a) the date of inspection;
 - b) the name of the person who conducted the inspection;
 - c) the observations made by that person during inspection including but not limited to:
 - i) the conditions of hazardous waste containers and all ancillary equipment;
 - ii) the conditions of secondary containment system and of any other mechanism that prevents the release of hazardous waste; and
 - iii) any indications of a release of hazardous waste or of any deteriorations of containers, piping, ancillary equipment or a secondary containment system that increase the likelihood of a release; and
 - d) recommendations for remedial action and actions undertaken.

59. The licensee shall make records of the inspections required by clause 58 of this licence available to an environment officer upon request.

Emergency Response

60. The licensee shall prepare, within 90 days of the date of issuance of this licence, and maintain an emergency response contingency plan in accordance with the Canadian Centre for Occupational Health and Safety "Emergency Response Planning Guide" or other emergency planning guidelines acceptable to the director.
61. The licensee shall keep a copy of the emergency response contingency plan on site, in a location accessible to all persons who will be assigned duties at the facility, at all times. The plan shall be made available to an environment officer upon request.
62. The licensee shall review the emergency response contingency plan on an annual basis, as a minimum, and make revisions as required.

Annual Hazardous Waste Receiver Report

63. The licensee shall, on or before the 31st day of March of each year, submit to the director an annual report respecting the hazardous waste received by the facility pursuant to this licence during the previous calendar year and the manner in which the waste was treated or disposed of as defined in the Hazardous Waste Regulation under The Dangerous Goods Handling and Transportation Act. The report shall be made on a form approved by the director or submitted in a format acceptable to the director.

Retain Records

64. The licensee shall, unless otherwise specified by this licence, retain all records relating to this licence during the full life of operation of the facility, and after closure, for such period of time as may be specified by the director. Records may be transferred from their original form to other accepted forms for information storage. These records shall be made available to an environment officer upon request.

Alterations and Decommissioning

65. The licensee shall obtain approval, in writing, from the director for any proposed alteration or expansion to the facility which is likely to cause a significant environmental effect or could affect compliance with any clause(s) of this licence, before proceeding with the alteration.
66. The licensee shall, at the request of the director in the event that the facility is permanently closed, conduct an investigation in accordance with "Environmental Site Assessments in Manitoba", (June 2016), to the satisfaction of the director, to identify any contamination which may have resulted from the operation of the facility.
67. The licensee shall, where the investigation referred to in clause 66 of this licence shows that contamination of the environment has occurred, submit a remediation proposal, within 90 days, to the director and, upon approval of this proposal by the director, carry out the required remediation.

68. The licensee shall submit to the director in advance of the closure of the facility a plan to inspect the closed facility on a regular basis for any hazardous waste or dangerous goods placed at the closed facility. The licensee must manage the hazardous waste or dangerous goods in a manner approved by the director.

Agreement

69. The licensee shall, at all times during the operation of the facility, maintain a Manitoba Household Hazardous Waste Recycling Full Service Collection Site Agreement with the Product Care Association.

REVIEW AND REVOCATION

- A. If, in the opinion of the director, the licensee has exceeded or is exceeding or has failed or is failing to meet the specifications, limits, terms, or conditions set out in this licence, the director may, temporarily or permanently, revoke this licence.
- B. If the licensee has not commenced construction of the facility within three years of the date of this licence, the licence is revoked.
- C. If, in the opinion of the director, new evidence warrants a change in the specifications, limits, terms or conditions of this licence, the director may require the filing of a new application pursuant to The Dangerous Goods Handling and Transportation Act or any future amendment thereof.
