

Notice of Environment Act Proposal

Manitoba Conservation and Climate has received a proposal pursuant to The Environment Act regarding the following operation and invites public participation in the review process:

CANWHITE SANDS CORP. – SILICA SAND EXTRACTION PROJECT – FILE: 6119.00

An Environment Act Proposal has been filed by CanWhite Sands Corp. for the sequential installation, operation and decommissioning of silica sand extraction wells to remove water and silica sand from groundwater at various locations on private land within the R.M. of Springfield. The water from the silica sand slurry brought to the surface from the wells would be separated from the sand on site, undergo UV treatment and returned down the wells. The separated silica sand would be transported to a previously proposed sand processing facility using a slurry transport line operating in a loop system.

Anyone likely to be affected by the above operation and who wishes to comment on the proposal should submit comments by email at publicregistry@gov.mb.ca not later than October 7, 2021. Further information is available from the Online Public Registry: www.gov.mb.ca/sd/eal/registries

Information submitted in response to this proposal is considered public information and will be made available to the proponent and placed on the public registry established in accordance with Section 17 of The Environment Act.
