SUBJECT: Color Ad Packaging Ltd. – Rotogravure Engraving Facility (File 6123.00)

Air Quality Section has reviewed the above proposal and provides the following comments:

- It is expected that there will be no significant impact on ambient air quality provided that the plant is equipped with the scrubber system to control the potential air emissions prior to release to the environment.
- Air Quality Section suggests that the EA Clause regarding noise and odour nuisance be included.

No specific concerns, other than I did not see any specific plans to mitigate the risk of a fire (just plans to respond to one). Since there is a residential area nearby, it would be reassuring to hear that they had measures in place to prevent fires in their facility.

Note that Figures 1 & 2 (site maps) were not included. There was a reasonable description in the text, though, and I looked it up on Google Maps.

A minor point, but the author should not really be saying there are no climate impacts related to this industry. Emissions from trucks transporting their materials/goods would not be “negligible”. I don’t think these statements are accurate.

Good morning Eshetu,

There are no known Petroleum Deposits or infrastructure in the area and therefore Petroleum has no concerns.

Thanks.

Leo

**SUBJECT: Environment Act Proposal – Color Ad Packaging Ltd. - Rotogravure Engraving Facility
(Client File No. 6123.00) – 630 Kernaghan Avenue, Winnipeg**

Environmental Compliance and Enforcement (ECE) has reviewed the above noted Environment Act Proposal and can provide the following:

1. Please provide confirmation of the lease agreement between Color Ad and the landowner.
2. Spill containment, and spill clean-up materials and procedures are to be in place for the chemicals stored on site.
3. In the event of a fire, release, spill, leak or discharge of a pollutant or contaminant to the environment, immediately report the incident to Environment, Climate and Parks by calling the 24-hour Emergency Response Line at (204) 944-4888 or 1-855-944-4888. Provide a report following the incident with details of the occurrence, clean-up actions and future mitigation of a similar event.
4. Ensure the Health & Safety Plan and the Fire Safety Evacuation Procedure include procedures to address:
 - spill clean-up
 - notification of fire and other environmental emergencies to the Emergency Response Line

No concerns at this time.

If at any time, however, heritage resources are encountered in association with these lands during testing and development, the Historic Resources Branch may require that an acceptable heritage resource management strategy be implemented by the developer to mitigate the effects of development on the heritage resources.

If you have any questions or comments, contact the Archaeological Assessment Services Unit as above.
