Re: PADCOM Potash Solution Mining Project (File 6126.00) - Record Drawings

Dear Agnes Wittmann:

Kontzamanis Graumann Smith MacMillan Inc. (KGS Group) is submitting this letter on behalf of Potash and Agri Development Corporation of Manitoba Ltd. (PADCOM) regarding Environment Act Licence (EAL No. 3375) that was issued on May 30, 2022 for their Potash Solution Mining Project (the Project). In accordance with Clause 65 of the Licence, PADCOM was required to submit a set of Record Drawings for the development within one year, which would be May 30, 2023. As indicated in the Notice of Alteration submitted on April 20, 2023, construction was delayed while waiting for the Mine Closure Plan to be approved. As such, on behalf of PADCOM, KGS Group requested and the Environmental Approvals Branch approved that the deadline to submit the Record Drawings be extended to March 3, 2024, 1-year from the date the Director of Mines approved the Mine Closure Plan. KGS Group continues to work on the Record Drawings as the construction activities progress, however, as construction is still not complete PADCOM is again requesting that the deadline to submit the Record Drawings be extended until October 31, 2024.

Should you have any questions or wish to discuss this matter further, please do not hesitate to contact the undersigned.

Yours truly,

Shaun Moffatt, M.Sc.
Senior Environmental Scientist
