Subject: EA Licence No 3371 Construction Extension Requested

Hi Nada,

The project owners for EA Licence 3371, Abas Girls Inc and Abas Girls Ranch, are requesting an extension for the commencement date of construction of the wastewater treatment lagoon. Due to business factors and supply issues related to Covid-19, the project commencement was delayed. Additionally, the proponent is exploring the installation of a low pressure sewer to convey the effluent to the Stony Mountain Wastewater Lagoon. If the Municipality supports the low pressure sewer, an amendment to the Stony Mountain Wastewater Lagoon licence will be requested shortly. If an agreement cannot be reached with the Municipality, the proponent would like to proceed with the lagoon.

Please advise if you require additional information in order to issue an extension for the lagoon construction commencement deadline.

Sincerely,

Jessica Manness, B.Sc, P.Eng
