Arow Global Metal Fabrication

Air Quality Section has reviewed the above proposal and provides the following comments:

- The submitted proposal described that all types of metal fabrication processes such as milling, cutting, welding etc. will be performed in an enclosed area. Therefore, it is expected that there will be no significant impact on ambient air quality
- Air Quality Section suggests that the EA Clause regarding noise nuisance be included.

Hello,

Following are the comments from Groundwater Management;
Steps should be implemented for containment of spills while offloading, storing and handling the drums with hazardous waste. Plan and procedures should also be implemented in handling drums that may contain wet products. Spillage during handling waste/hazardous material should be minimized and if spillage occurs, it should be cleaned up before infiltrating.
The proponent may also wish to consider requiring that the area where short term storage takes place is clay lined and that a tarp be placed over the clay when chemicals are present.

Thanks,
Muhammad

No Concerns at this Time

Further to your e-mail regarding the above noted application, the Manitoba Historic Resources Branch (HRB) has examined the location in conjunction with Branch records for areas of potential concern. The potential to impact to heritage resources is believed to be low based on analysis of current data and evaluated by the type of action proposed, therefore, the HRB has no concerns with the proposed project at this time. This evaluation is only appropriate for this respective request.

Legislation

Under Section 46 and 51 of the Heritage Resources Act (the Act), if at any time, heritage resources are encountered in association with these lands during testing and development, there is an obligation to report any heritage resources and a prohibition on destruction, damage or alteration of said resources. HRB may require that an acceptable heritage resource management strategy be implemented by the proponent/developer to mitigate the effects of their activity on the heritage resources. A copy of this legislation can be found at this address:

- <https://web2.gov.mb.ca/laws/statutes/ccsm/h039-1e.php>.

If you have any questions, please contact as above for proper assignment and queueing.

Hi Eshetu. I appreciate the proponent has already completed air quality and noise studies. I don't have any specific concerns related to these. I was wondering if they could comment on the potential for an industrial fire or explosion at the site, though, and how they would mitigate these risks. I note that they are adjacent to the Tyndall Park area.

Thanks,
Lisa
