**Subject:** 6179.00 - request for information

Good morning Danette,

We have reviewed your proposal and we have an additional question about the project.

- In the proposal, the new raw water pipeline would be connected to the existing water treatment plant and the long-term water requirement could increase to 7.5 L/sec. Could you describe the water treatment process, the product stream(s) that are created (e.g., potable water, effluent stream, etc.), and how the products are managed or disposed? Please include any pertinent information for the environmental assessment and licensing for any items that can impact human health and the environment.

Please let me know if you have any questions or would like to discuss.

Thanks,

Jay Mak, P.Eng.
