Subject: File 74.30 Town of Winnipeg Beach - Lagoon Upgrade EAP - Further Information Request

Hi Francesco,

This is further to our phone conversation yesterday and earlier today regarding the above noted EAP, your File No. 13-8588. I am drafting the licence. However, further information is needed before completion of the draft licence. Please provide the information listed below at your earliest convenience.

- Clear schematic drawing (without aerial photo, legible annotations, etc.) of the entire wastewater treatment lagoon system as proposed to be upgraded, for inclusion in the licence
- Depth of operation of each of the five cells of the lagoon
- Confirmation of the proposed location(s) and number of discharge points (a drawing identifying the discharge routes and points will be helpful for increased clarity)
- Explanation regarding system operation of the north lagoon cells as stated in Section 4.5 of the EAP relative to that provided for the south cells explained in Section 5.1 of the EAP, including but not limited to:
 - Whether treated or untreated wastewater will be directed to the two cells north of Kernstead Road
 - Type of treatment to be provided to achieve the desired discharge effluent quality, if untreated wastewater will be directed to the north cells
 - Discharge management from the north cells
 - Effluent sampling and monitoring from the north cells
 - The impact of discharge from the north cells on the average daily discharge flow from the south cell
- Whether or not there is fence around each series of cells located north and south of Kernstead Road

Regards,

Bereket Assefa, Ph.D., P.Eng.
Environmental Engineer
Municipal and Industrial Section
Environmental Approvals Branch
Conservation and Water Stewardship
