

Notice of Environment Act Proposal

Manitoba Environment, Climate and Parks invites and welcomes comments on the following proposal:

Manitoba Environment, Climate and Parks – Paint Lake Wastewater Treatment Lagoon Expansion – FILE: 844.40

Manitoba Environment, Climate and Parks proposes to expand the wastewater treatment lagoon at Paint Lake Provincial Park. The expansion would provide improved treatment and capacity for the next 20 years of park operation. The lagoon's primary cell would expand to the northwest, and the smaller of the two existing secondary cells would be decommissioned. Treated effluent would continue to be discharged to a natural wetland about one kilometre north of the lagoon. Construction of the expansion is planned for 2023.

Anyone affected by the operation and who wishes to comment on the proposal should contact Bruce Webb, Senior Environmental Engineer, in writing or by email at Bruce.Webb@gov.mb.ca no later than December 28, 2022. Further information is available from the Online Public Registry: www.gov.mb.ca/sd/eal/registries

Comments on this proposal are considered public information and will be made available to the proponent and placed on the public registry under section 17 of The Environment Act.
