## **Supplementary Documentation**

A fuel supplier must file a supplementary report with the director within 60 days after the fuel supplier becomes aware that

- (a) information in a report filed for a previous reporting period did not completely and accurately disclose the information required to be included in the report for that period; or
- (b) information required to be reported in a previous report has changed.

### **Note:**

A fuel supplier is defined as a registered collector under *The Fuel Tax Act* (Manitoba).

Fuel suppliers must report volumes that they sold in Manitoba (placed in the market). Each volume should be reported only once; when it is first sold (placed in the market). Volumes sold in Manitoba include volumes used by a fuel supplier or sold at wholesale or retail in Manitoba. Volumes sold in Manitoba do not include gasoline and gasohol sold in exempt areas.

A transaction (under an inter-fuel supplier agreement) between fuel suppliers is not considered a sale.

Gasohol is defined as a blend of Denatured Ethanol and gasoline in which the Denatured Ethanol content is at least 3% of the total volume.

Gasohol and gasoline that are sold for export are not subject to the mandate.

Fuel suppliers that do not sell gasoline at wholesale or retail in the Manitoba market are not required to complete this form.

Calculation of the %DE shall be rounded to the nearest one-hundredth or where it is equidistant to the higher one-hundredth.

Exemption report must be submitted within three months after the end of a reporting period.

A fuel supplier must complete this compliance report to include the period from March to June 2024 in which the Winnipeg Products Pipeline (WPPL) was non-operational.

A fuel Supplier must complete the Shortfall/Penalty Report if not compliant.
