A Birthday Park for Canada

B

The park is a haven for a wide range of wildlife. It hosts a number of birds, including the endangered whooping crane, and provides habitat for many species of mammals, such as the black bear and wild turkey. The park is also home to a number of plants, including the rare prairie crocus.

C

Among the mammals commonly found in the park are the white-tailed deer, the black bear, and the prairie dog. The park is also home to a number of reptiles and amphibians, including the copperhead snake and the wood frog.

B

The park is managed by the Manitoba Parks Division, which is responsible for the maintenance and management of the park's natural and cultural resources. The park is open year-round, and offers a wide range of activities, including hiking, biking, and birdwatching.

D

The park is also home to a number of educational programs, including the Manitoba Interpretation Program, which provides opportunities for education on a variety of topics, at all levels of school curriculum. Teachers can use park facilities and equipment to teach a wide range of subjects, including science, history, and geography.

E

The park is also home to a number of cultural resources, including a number of historic sites and monuments, such as the Pine Ridge Cemetery, which is the final resting place of many of the pioneers who settled the area.

F

The park is also home to a number of outdoor recreation activities, including hiking, biking, and birdwatching. Paddling along the Duck River, exploring the forested areas, and watching the wildlife are all popular activities.

G

The park is also home to a number of natural features, including the Duck River, which is a popular destination for paddlers and anglers. The river is home to a number of species of fish, including the walleye and the northern pike.

H

The park is also home to a number of cultural resources, including a number of historic sites and monuments, such as the Pine Ridge Cemetery, which is the final resting place of many of the pioneers who settled the area.

I

The park is also home to a number of natural features, including the Duck River, which is a popular destination for paddlers and anglers. The river is home to a number of species of fish, including the walleye and the northern pike.

J

The park is also home to a number of cultural resources, including a number of historic sites and monuments, such as the Pine Ridge Cemetery, which is the final resting place of many of the pioneers who settled the area.

K

The park is also home to a number of natural features, including the Duck River, which is a popular destination for paddlers and anglers. The river is home to a number of species of fish, including the walleye and the northern pike.

L

The park is also home to a number of cultural resources, including a number of historic sites and monuments, such as the Pine Ridge Cemetery, which is the final resting place of many of the pioneers who settled the area.

M

The park is also home to a number of natural features, including the Duck River, which is a popular destination for paddlers and anglers. The river is home to a number of species of fish, including the walleye and the northern pike.

N

The park is also home to a number of cultural resources, including a number of historic sites and monuments, such as the Pine Ridge Cemetery, which is the final resting place of many of the pioneers who settled the area.

O

The park is also home to a number of natural features, including the Duck River, which is a popular destination for paddlers and anglers. The river is home to a number of species of fish, including the walleye and the northern pike.

P

The park is also home to a number of cultural resources, including a number of historic sites and monuments, such as the Pine Ridge Cemetery, which is the final resting place of many of the pioneers who settled the area.

Q

The park is also home to a number of natural features, including the Duck River, which is a popular destination for paddlers and anglers. The river is home to a number of species of fish, including the walleye and the northern pike.

R

The park is also home to a number of cultural resources, including a number of historic sites and monuments, such as the Pine Ridge Cemetery, which is the final resting place of many of the pioneers who settled the area.

S

The park is also home to a number of natural features, including the Duck River, which is a popular destination for paddlers and anglers. The river is home to a number of species of fish, including the walleye and the northern pike.

T

The park is also home to a number of cultural resources, including a number of historic sites and monuments, such as the Pine Ridge Cemetery, which is the final resting place of many of the pioneers who settled the area.

U

The park is also home to a number of natural features, including the Duck River, which is a popular destination for paddlers and anglers. The river is home to a number of species of fish, including the walleye and the northern pike.

V
