courses include parking,
lunch and a coffee
break.

The Onsite Wastewater Management Course is a five-day program designed for septic field installers and contractors who wish to be certified with Manitoba Sustainable Development as Onsite Wastewater Management Systems Installers.

The course consists of a manual, classroom instruction, a written exam and industry displays to showcase the latest onsite wastewater management products. Course is held @ RRC Notre Dame campus in Winnipeg.

- o September-October annually
- o May annually

Upon successful completion of the course participants will receive a Red River College Certificate of Achievement they can present to Manitoba Sustainable Development to be registered as a Certified Installer. Grade 11 is a suggested requirement.

Course Description

This course prepares the participants to write the exam required by Manitoba Sustainable Development in order to apply to be a certified installer of onsite wastewater systems. For information, visit Manitoba Sustainable Developments website @ <https://www.gov.mb.ca/sd/envprograms/wastewater/index.html>.

Course topics include basic mathematics, legal and administration requirements, health and safety, confined space entry, wastewater characteristics and treatment, soils analysis, soils field test, disposal fields, septic tanks, pumps / controls / alarms, secondary treatment systems, sand mounds, total area fields, field design calculations, construction and installation, inspection and maintenance, wastewater hauling, and permit requirements / review.
