May 28, 2018

Dear Ms. Porco:

Re: UST Soil Sampling at the Magellan Aerospace Limited, Rockwood Propellant Plant, Rockwood, Manitoba; Review under the Contaminated Sites Remediation Act

This letter is to acknowledge receipt of the report entitled "*UST Soil Sampling at the Magellan Aerospace Limited, Rockwood Propellant Plant, Rockwood, Manitoba*" prepared by Golder Associates Ltd dated May 15, 2018 for the above-noted property (the site).

The above report notes:

- The analytical results indicated that the soils sampled from the excavation stockpile were below the applicable guideline and that the soils area acceptable for re-use at the site.
- A minor exceedance of ethylbenzene (0.084 mg/kg vs. a criteria of 0.018 mg/kg) on the south sidewall of the excavation was noted however, it is not considered to be a significant environmental concern as long as the site remains an active industrial site.

It is the position of Manitoba Sustainable Development that no further remedial activities are required at the site at this time in regards to the UST removal. In the event that any residual contamination remaining in the soil results in some form of exposure concern in the future, the site may be designated and the responsible party will be directed by this department to initiate any remedial measures.

It should be noted that the position of Manitoba Sustainable Development as stated in this letter is based on the information provided to this office by Golder Associates Ltd and relates only to the matters within the scope of work that was conducted by Golder Associates Ltd.

If you have any questions regarding this letter, please contact Warren Rospad, Contaminated Sites Program Specialist at 204-330-2685 or warren.rospead@gov.mb.ca. Please note that electronic submissions are preferred for all documents and correspondence.

Sincerely,

Tracey Braun
Director
