Mr. Andy Galarnyk
Centra Gas Manitoba
444 St. Mary Avenue
Winnipeg, Manitoba
R3C 3T7

Dear Mr. Galarnyk:

**RE: PROPOSAL FOR STUDY OF CONTAMINATION AT THE CENTRA GAS
SUTHERLAND AVENUE SITE**

I am writing to advise that we reviewed the proposal to study the past contamination at the former Centra gas coal gasification site located on Sutherland Avenue. We have also discussed this matter in detail with representatives of Manitoba Environment. Based on this review, I wish to advise that we are in agreement with the proposal presented for studying the subject contamination.

So that we may properly be informed on the study's progress, we request that you provide us with a copy of the consultant's report as it becomes available. Further, I wish to offer you and your consultants any background information that staff of this Division can provide. Over the years, staff of this Division have accumulated considerable knowledge and experience respecting both the water and benthic regimes of the Red River.

If you have any questions on the foregoing, or if we can be of assistance please contact the undersigned.

A.H. Permut, P.Eng.
Manager of Laboratory Services
