Dear Mr. Eason:

Re: Disraeli Bridges Project – Draft River Drilling Program

This will acknowledge your email of October 18, 2010 and attached draft River Drilling Program regarding the river drilling program in the Red River.

The draft River Drilling Program letter has been reviewed and Manitoba Conservation has no concerns with the proposed approach from a contaminated materials management perspective. It would be appreciated if Tetra Tech could provide a final copy of the drilling program once it has been finalized along with a short report, including analytical results at the conclusion of the drilling program. Environment Officers from the department may be present for some of the drilling activities, but will observe from the shore line and will be equipped with standard level A PPE.

If you have any questions regarding this matter, please do not hesitate to contact me at 945-7053.

Yours truly,
