**Importance:** High

Good afternoon Warren,

Manitoba Hydro will be collecting subsurface samples from the immediate area surrounding a 'sink hole' in the parking lot immediately south of 35 Sutherland. The investigation will be completed by Manitoba Hydro personnel on July 17, 2017. The objective of the investigation is to determine the extent of contamination (i.e., coal tar, if present) in order to inform a Remedial Action Plan (if necessary) and parking lot repair requirements. A summary report will subsequently be authored and shared with Manitoba Sustainable Development.

A photo of the location is attached. The sink hole has been filled with granular material temporarily to ensure safety for Manitoba Hydro employees accessing the parking lot.

For additional information, please contact Bob Gill or Shauna Zahariuk of Manitoba Hydro at (204) 360-3314 and/or (204) 360-4301, respectively.

Sincerely,  
Shauna
