

# ATTENTION HUNTERS:

## Biological samples are compulsory

---

The Manitoba government has enacted measures to protect wild elk and deer from disease.

By law, hunters must submit biological samples (head, upper neck and lungs) of elk and deer taken in certain Game Hunting Areas to Manitoba Sustainable Development. Samples are checked for any signs of disease.

Samples are required from elk and deer taken in Game Hunting Areas 5, 6, 6A, 11, 12, 13, 13A, 18 and 18B (west of PR 366) 18A, 18C, part of 22 (west of PTH 83), 23, 23A and 27. Please submit samples within 48 hours of the kill. Samples may be submitted to any of the following locations during regular business hours:

Benito Premium Meats Ltd – Benito, MB  
Boissevain District Office – Boissevain, MB  
The Iron Rail – Cartwright, MB

Riding Mountain National Park –  
Wildlife Lab Wasagaming, MB  
Tempo (Gas Station) – Winkler, MB

### Ban on Feeding

The feeding of deer, elk and moose in the above noted GHAs is prohibited.

### Bringing game into Manitoba

It is illegal to bring a deer, elk or moose killed in another province or state into Manitoba unless the head, hide, hooves, mammary glands, entrails, internal organs and spinal column are first removed and left in the province or state of origin. Please refer to the Manitoba Hunting Guide for instructions on properly removing and treating the antlers and bone plate.

### For more information

To learn more about wildlife disease and the submission of biological samples, please refer to a copy of the 2018 Manitoba Hunting Guide, visit [www.manitoba.ca/sd/wildlife/disease](http://www.manitoba.ca/sd/wildlife/disease) or call 204-622-2474.
